LIBERTY HOMES

FOR

1935

LEWIS MFG. CO.

BAY CITY, MICH.

Read what these LIBERTY HOME OWNERS Say...

"Wonderful Bargain"

"It is a pleasure to write and tell you how we feel about our Liberty Home. We are very proud of it. We are very proud Senator said this was the nicest penter inside trim he ever used, and he sure has done a lot of work for people around here. "We wish to thank you for the wonderful bargain we are very much pleased with our home."

Mr. and Mrs. H. Pierce (New Jersey)

"Such a Warm House"

"We have enjoyed all of our dealings with you and if we have an opportunity to help you in any way we will be glad to do so.

"We certainly enjoy our home very much. It has been an awful cold winter here but we haven't minded it at all with such a warm house.

"Thanking you again for past favors, and if we ever would build again, we sure would order from Lewis Manufacturing Company."

Bert Robinson (New York)

"Well Satisfied"

"I am taking the greatest pleasure to write you this letter to tell you I have just completed my little home enough. I never in my life saw anything come out so even and nice as this did. Everything just seemed to fall into place and to see the carpenter put it together certainly was great. If anyone I know is going to build I will certainly praise these homes as I am so pleased with mine. I cannot say too much for them."

M. G. Cooper (New York)

"Cannot be Beat"

"My Lafayette is certainly all you claim for it and more. Everyone is surprised at the room in it. The doors and finishing lumber sure stained and varnished nice and cannot be beat for looks. Had plenty of everything and some materials left over.

"When one considers the savings in buying a Liberty Home and the time saved in erecting same, it is just a waste of both time and money to build otherwise."

James Leasure (Ohio)

"Rooms So Cozy"

"I do not know just how to tell you how pleased and satisfied we are with our National. The rooms are all so cozy. I have had folks come from far and near to see the house and they have left with praises for the Lewis Manufacturing Company and the way you do business—for we have opened up our home to everyone who cares to see it.

"Please tell Mr. Dixon that it was sure a lucky day for us when he sent us our Liberty catalog, and we want to thank him for the help he gave us."

Charles Herring (Indiana)

LIBERTY *Ready Cut* HOMES

Lewis Manufacturing Co.

ESTABLISHED 1896

BAY CITY, MICHIGAN

OFFICE OF THE VICE-PRESIDENT

Dear Friend:

Here is the new 1935 catalog of Liberty Homes. The more carefully you read it, the more convinced you will be, I believe, that it offers you the opportunity of securing a first-quality home at a price considerably lower than the same type of home would ordinarily cost you.

There is no easier or quicker way of getting your new home built and completed, ready to move into, than to buy it on the Liberty plan. You simply order the particular house that you want and we ship you at once the materials that you will need in building it — lumber cut to fit, ready to erect — also sash, doors, paint, glass, hardware, etc. Instead of having to shop around and buy all of the various kinds of materials, item by item, you receive them from us all in one lot, at a quantity price much lower than you would otherwise have to pay.

During the 39 years that we have been in business, thousands of families in all parts of the country have done just what you are doing now. They studied our catalog, selected the Liberty Home that suited them best, filled out the order blank and, surprising as it may seem, had their home finished and were living in it before the next rent-day rolled around. How well pleased they are you will see when you read their letters on the following pages.

The way is open to you to secure a Liberty Home just as many others have done before you. Here's the way to go about it! Read the catalog carefully. Pick out the home you like best and decide which of the four payment plans you prefer (see page 36). Then just mail the order blank. Or, if you wish any additional information before filling out your order, write me a letter on the back of this sheet. I am not sure how long we can maintain our present EXTREMELY LOW PRICES, as the costs of building materials are constantly rising. So it will be to your advantage to place your order as soon as you possibly can. Mail your order or write me today!

Sincerely yours,

Thomas P Dixon

Thomas P. Dixon, Vice-President
and General Manager

DIRECT FROM FACTORY TO YOU

Take Your Pencil and Write Me a Letter

If there is anything you don't understand, just write me about it and I'll answer your letter personally. Tell me which Liberty Home you are most interested in and what questions you would like to have explained. I'm never too busy to answer questions, and I want you to write me the same as you would talk to me. Use this sheet of paper.

Mail to
THOMAS P. DIXON,
Vice-President and General Manager,
LEWIS MANUFACTURING CO.
BAY CITY, MICH.

What is the LIBERTY READY CUT SYSTEM *of* HOME BUILDING?

YOUR home is the most important purchase you will ever make. Probably the largest in dollars and cents; certainly the one that will most directly influence your comfort, happiness and well being for many years to come. Surely, in considering this purchase, your first thought should be to provide the greatest possible assurance that your new home will be all you expected it to be. Liberty Homes and the Liberty Ready-Cut System give you that assurance. The Liberty System takes the gamble and uncertainty out of building—protects you from the heartaches that result from faulty planning, excessive costs, and improper or inferior materials.

In every Liberty Home the construction is of the same type as that of the attractive, costly Architect-Built homes you have often seen and admired. They are erected in exactly the same manner as any other sturdy, substantial home is built, each individual piece of material stoutly and permanently nailed in place in the same way that first-class carpenters are accustomed to build good homes.

Briefly, the Liberty System of Home Building is simply this—a sytem by means of which you can select from a large variety of styles and sizes of houses the one which ideally meets your idea of the kind of a home you would like to own. It offers you the protection of a Complete Home-building Service, including not only the architectural plans and working instructions, but also the lumber, measured and cut in the proper lengths to conform exactly with the building plans. You are also furnished with the necessary sizes and quantities of nails, the hardware, paint, stains, varnish, doors, windows, lath, roofing and other materials specified in detail on another page of this catalog.

The result is a home that is not only architecturally correct in every particular but is built according to plans which have been tried and proved by hundreds of others like yourself who wanted a first-quality home at a fair and reasonable price.

Now turn the page and read the complete story of the Liberty Ready-Cut System and its many advantages from the standpoint of quality, ease of construction and, most important of all, LOW COST.

HOW VOLUME WILL SAVE

SAVE ON THE COST OF MATERIAL

There is no magic in our being able to furnish you with the materials for building your home at a price that will save you a substantial sum of money. The explanation is very simple!

In the first place, we manufacture an immense number of homes every year—and quantity production results in tremendous savings in the building of homes just as it does in the building of automobiles, refrigerators, stoves or any other manufactured product.

In the second place, we make another big saving by manufacturing the greater part of the materials here in our own mammoth mills which are equipped with the most modern, electrically operated woodworking machinery—machinery that is especially designed to cut lumber in accordance with our specifications, accurately and economically. By following the most efficient production methods, we are able to produce the finished product at a fraction of the usual cost.

Thirdly, the business we do is not confined to one small community, but is nation-wide in its scope. Consequently we are able to purchase materials in tremendous quantities at much more advantageous prices than if we had to buy our lumber, paints, hardware and other materials in small lots as a local contractor would have to do.

Then, too, we employ no agents, solicitors or traveling salesmen, whose salaries have to be added to the cost of what we sell. This, in itself, results in a considerable saving of money to you.

But the savings above mentioned are not all by any means. Read on and see how much the Liberty Ready-Cut System saves you in various other ways that are equally important.

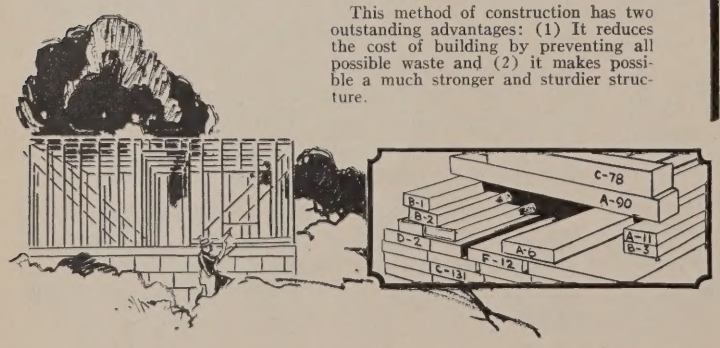
SKYSCRAPER METHOD OF CONSTRUCTION

Insures Accuracy and Eliminates Waste

The Liberty system of construction is exactly the same as the method followed in the erection of mammoth skyscrapers.

Just as the great steel mills make the framework of the skyscrapers piece by piece, to exactly the right measurements, so we cut the lumber for Liberty Homes piece by piece—each one just the right size exactly to fit the place for which it is intended.

This method of construction has two outstanding advantages: (1) It reduces the cost of building by preventing all possible waste and (2) it makes possible a much stronger and sturdier structure.



You Save the Cost of Wasted Lumber!

You pay only for the lumber that actually goes into your home—not for what is wasted in cutting.

When you have seen a new house going up, haven't you noticed how much wasted lumber there was lying around after the house was finished? This lumber cost the owner good money, but it was all wasted—either because the lumber was not of the right length to fit the place where it was to be used, or the carpenter made mistakes in measuring, and spoiled it.

The Liberty Ready-Cut System does away with this wasteful method of home building. You pay only for the lumber that actually goes into your house—not for what is wasted in cutting. The lumber is cut in the correct lengths right in our mill—and you are charged only for the exact amount that you actually need.

For example, if your house requires two-by-fours that are 8′ 2″ long, we ship you two-by-fours exactly this length—not 10 feet which would mean a 20% waste. The same applies to the sheathing, rafters, joists, plates and other principal materials which would greatly increase the cost of your home if a part of each piece of lumber had to be sawed off and thrown away.

But this is not all that you save—as you will see when you read the next page.

PRODUCTION YOU MONEY

We do the hard work for you right in our own Mill

In building a house, the part of the work that is the hardest and takes up the most time is the measuring, sawing and planing the lumber—getting it ready to put up. The actual work of nailing it in place is easily and quickly done.

Make it a point some day to watch a carpenter building a house and see how much time he spends with his rule and pencil, figuring and measuring the lengths and angles of the various pieces of lumber, and then count up how many hours each day are consumed in sawing all of the lumber by hand. You will realize at once that a good share of the carpenter's time is being wasted in doing things which could be done much more quickly and cheaply by machinery.

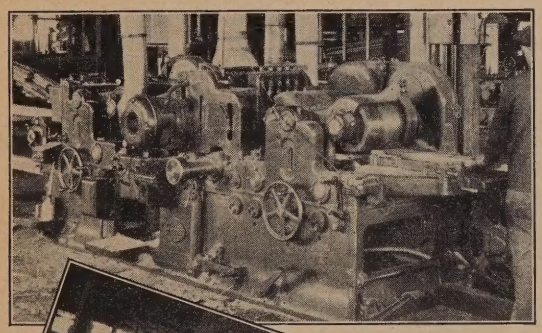
The Liberty System of Home Building eliminates entirely the expense of having to pay a carpenter for the hours he spends every day in getting the lumber ready to nail in place. In our mills the work of measuring, sawing and mitering is all done by machinery—not only in a fraction of the time it takes to do it by hand but also with absolute accuracy.

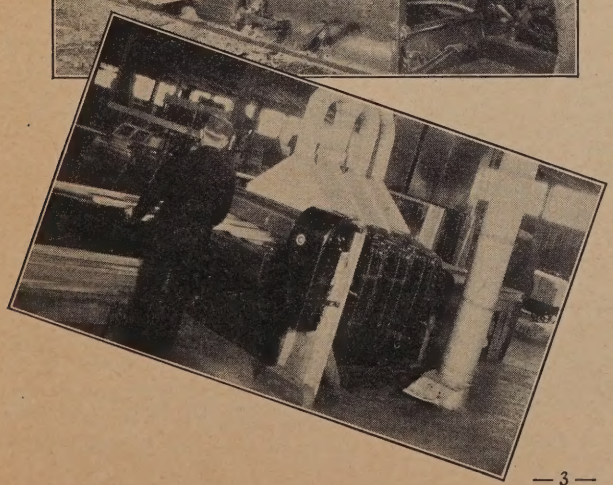
The result is that you will not have to pay a carpenter nearly as much to build a Liberty Home—because it will not take him nearly so long. In fact, it is not necessary to hire a carpenter at all. With the difficult measuring and sawing eliminated, you can take advantage of the assistance offered by your friends and neighbors, and trust them with the work of nailing—because the lumber is cut to exact size and fits into its proper place without any alterations.

SAVE ON THE COST OF LABOR

MAN POWER--*one board at a time.* Extremely slow, subject to mistakes and spoilage, very COSTLY . . .

MACHINE POWER--huge quantities, high speed, absolute accuracy and LOW COST . . .





Hours of Work Eliminated

By purchasing the materials for your home from us, cut to size and ready to nail in place, you save hours and hours of work.

For example, it takes a carpenter about eight hours to measure and saw the rafters for the roof of an average size house. In our mill, however, we can saw the rafters for two or three dozen houses in the same length of time.

When you consider that the same saving applies throughout the various other parts of the construction, you will see at once why the Liberty System enables you to build your home at such an extremely low cost.

Liberty Home Owners

Save $300 to $2,000

Read What These Owners Say!

The best evidence of the savings effected by the Liberty System of home building is found in the frank statements of those who have actually built Liberty Homes.

It would require dozens of pages to reproduce the multitude of letters which we have received from Liberty Home Owners telling how well pleased they are over the tremendous savings they made as compared with what they would have had to pay for a home of the same size at the prices charged by builders or contractors in their own locality.

The letters below are typical examples of what our customers say. Read them. They are conclusive proof that you can save hundreds of dollars by taking advantage of the Liberty Ready-Cut System when you build your new home.

Saved $1,000 on Materials

"We have our home all finished and are sure well pleased with it. I just wish you could come to see it, we are so proud of it. We believe we have saved at least $1,000.00 on materials and construction. We did all the work ourselves except plastering (that is the only hired help we had) and as it was the first building we ever tried to build we didn't know a thing about it. Just followed the 'blueprints'. I myself donned a pair of overalls, got a nail apron and helped build it. It was so easy. If there is anyone in doubt about building Liberty Homes just send them to us."

MRS. ELMER E. PREEO, Iowa.

Saved $500 to $800

"I am sure we saved from $500 to $800 on our home. We got a fair and square deal—nothing short whatever, —everything worked out just exactly. One particular feature I wish to mention is that every piece is plainly marked so that any person would have no trouble in building. I will gladly recommend your company to any person proposing to build a home."

MRS. EMMA BARNES, W. Va.

More for the Money

"I am not a carpenter, but with a hammer and a level I had no trouble at all in building my Liberty Home. I wrote four firms for prices and specifications, but I chose a Liberty Home because I felt I was receiving more for the money. I think we saved $750—possibly $1,000—over a contractor's price."

R. J. RUTT, Iowa.

Saved over $1,500

"My National Liberty Home is one of the nicest little homes for its size in this community. Everyone admires it, and they tell us too that we have saved a couple thousand dollars because other houses around here of the same size cost from $1,500 to $2,000 more than mine did. So I feel that I saved at least $1,500, besides all the worry I saved by building a Liberty ready-cut house instead of some other kind."

HERMAN HAFER, Ill.

Everyone Praises Material

"Everything came in good shape, and went together nicely. The finishing lumber is exceptionally fine. Everyone has praised it that has seen it. I calculate that I have saved $1,000.00 in lumber alone, considering the prices that our local dealers ask around here."

ERNEST F. BROWN, Conn.

Saved $1,000 on His Home

"I wish to state that I secured quotations from various firms, and after comparing prices and materials I sent my order to the Liberty Company. I shall never regret this for I saved $1,000.00 on my 'Mayflower' home."

JULIUS KART, N. Y.

Saved $1,000 to $1,500

"I want to say that anyone who wants to save money should build a Liberty Home. The material is all first class. The different people who have examined my home were certainly surprised to see such a good grade of lumber, for such a low price. By consulting the price of lumber at different lumber companies near my residence I have estimated a saving from $1,000 to $1,500 by buying from you."

G. A. HAHN, Pa.

Saved at Least $2,000

"We are living in our new home and are sure satisfied with it and the prompt service and treatment. I consider the material first class, and will say I have saved at least $2,000 as compared with what it would have cost me if I had bought material at home."

A. B. HILLS, Pa.

Beat Contractor's Prices

"When I got the material for my Liberty Home, a lumber dealer here asked me if he could look at it to see if he could compete with it, and he told me he could not begin to give me the same lumber for the price I paid. I had three contractors figure on the same kind of a building, but the best price I could get was $750 more than my Liberty cost me."

JOHN RYAN, Wisc.

Saved Over $1,000

"I am more than pleased with the 'Sheridan.' It is a very nice looking home. I have it completed with nice hedges in front. I figure I saved over $1,000 on my home. It is very good material, and was very quick to build and every piece was cut to fit. My house is very warm and cozy. I have had several people come to see my house, and was very proud to show them all my home. I have seen several new houses built up around here, but I much prefer my Liberty Home from any I have seen, with less cost, better material and quicker to put up."

C. V. LEIGHTON, Conn.

Saved at Least $1,000

"I want to tell you how thankful I have been for the day when I saw the "Liberty Homes" advertisement in a magazine. I have saved at the very least one thousand dollars on my Liberty Home. As for the construction of Liberty Homes, if the plans are followed they are very simple to erect and as substantial as any other type constructed. Every piece fits perfect, for I put up the entire house myself without any other help, and enjoyed doing so."

THOS. J. CULHANE, Pa.

Got a Real Bargain

"Our Liberty home cost us about $4,450, including the lot, 2-car garage, septic tank, furnace, bath room, electric fixtures and all labor, as we hired all of the work done. There is a house a block from us very nearly the size of ours for which the owner paid $7,200 to contractor. Makes us feel that we got a real bargain."

F. W. KOCH, N. Y.

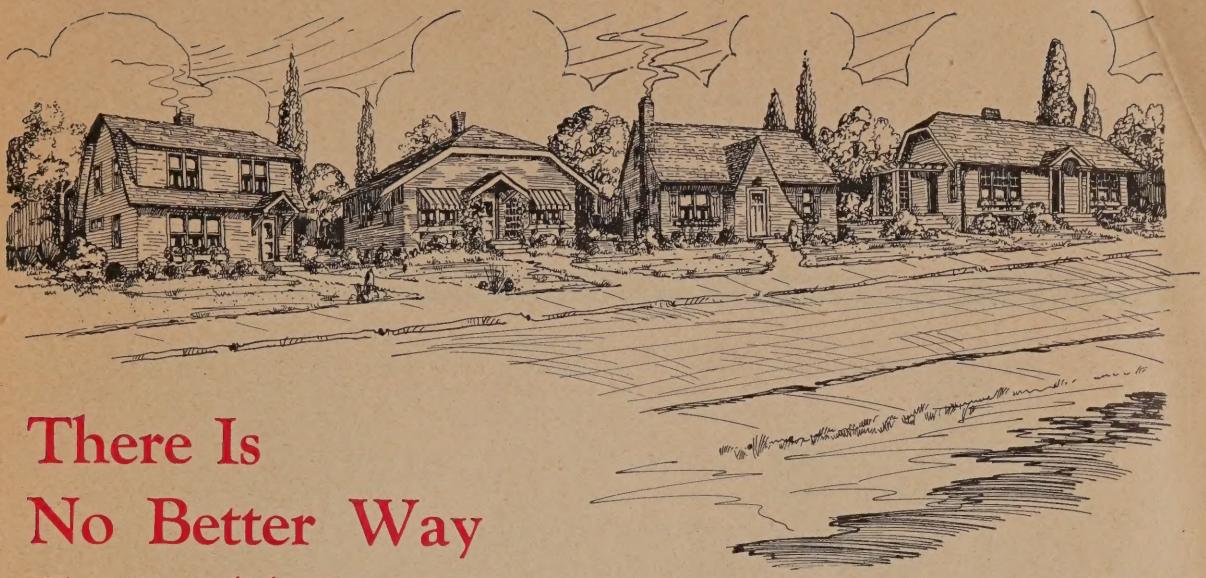
"Saved $1500.00"

"Am writing to tell you how well pleased we are with our new Liberty Home. It surely is all you claimed for it. The material was as good or better than we could have bought at home for more money.

"The plans and instructions were so simple anyone who can read and understand English, and use a hammer, could do most all the work.

"We saved at least $1500 on our house compared to what other houses in our neighborhood are costing."

A. R. BATES, Wisc.



There Is No Better Way To Build A Home . . .

Years ago, before the Liberty Method of home-building was established, the ideal way to build a home was to have the work supervised from beginning to end by a capable architect who was experienced in designing and building good homes. An architect understands proper construction methods; he knows the proper materials to use for each particular purpose; he sees to it that your home is built exactly in accordance with approved plans and specifications. Such individual personal service naturally resulted in considerable expense to the home-builder and on account of this cost, the majority of people who build small homes feel that they cannot afford the expense of an architect.

No Extra Charges For Plans or Service

When you build a Liberty Home you receive the benefit of this valuable service without having to pay any extra fee. Every Liberty Home is designed by an experienced architect, and the materials are selected and manufactured exactly in accordance with his detailed plans and specifications.

Our architectural service assures you that your home will be properly constructed in every particular. On the other hand, if you hire a carpenter to furnish the material and build you a house for a certain sum of money, there is no way for you to know definitely what the final results will be. He has no detailed specifications or architects' plans which must be followed. He may scrimp here and there, perhaps splicing short pieces of lumber together where full length pieces are required. The result usually is a house of flimsy construction. When you build a Liberty Home, however, all this uncertainty is avoided and you have a home in which the smallest detail of construction is correct, and a home you can be proud of during the years to come.

The Secret of Liberty Sturdy Construction

The secret of the sturdy construction of Liberty Homes lies in the high quality of the materials which we supply and the fact that all of the lumber is cut to exact dimensions. When you build the sub-structure and erect the walls, they are all straight and plumb. Every piece of lumber is cut the right length and at the correct angle to fit perfectly. Consequently, when the construction work is all finished, you have a house that stands four square—everything exactly as it should be in a structure that is built to last.

Comparison Proves Liberty is Better

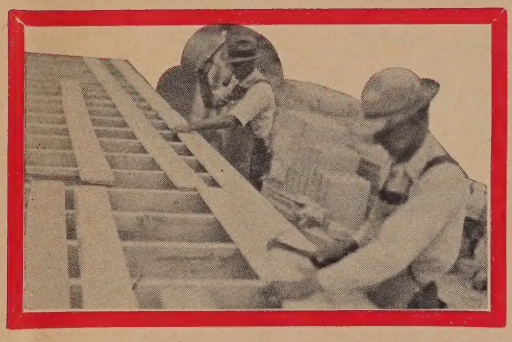
Contrast this with houses that you see a carpenter erecting without architectural supervision. Observe how the carpenter has filled in here and there with crooked boards and short pieces full of knots. Then when the house is finished, squint along the walls and see if they are straight. See if the rooms are the same dimension at one side as at the other by examining the floor boards, or by looking to see if the wallpaper has the same pattern in the corners of the room from the top to the bottom. These are some of the things which tell at a glance whether a house is constructed accurately to exact measurements.

Every Detail of Construction Is Correct

There is no better way to build a home than by the Liberty System which assures you not only that the plans from which it is built are architecturally correct in every detail but also that all materials are exactly as itemized in the specifications and are cut so that they will fit perfectly in the places for which they were intended.

Many Liberty Owners Say

They Built It All Themselves



Some who have bought Liberty Homes prefer to do all of the carpenter work themselves. If you have the time to do it, you will save just that much more money, and, in addition, you will have a great deal of pleasure. The fact that Liberty construction plans are so much more complete than the usual architects' drawings makes it possible to build a Liberty Home without the least difficulty.

The figures at the bottom of the page will give you an idea as to how long it will take to erect the particular Liberty home you want, if you hire one carpenter and two helpers to do the work. You can, of course, shorten this time considerably by arranging to help in whatever spare time you have, thereby also reducing the expense of carpenter labor.

You will see by the letters from our customers that many of them had no outside help at all—yet they did not have the least bit of trouble.

Wife Helped Him Build

"Anyone can build a Liberty home, because I did most of the work myself with the help of my wife, and I am far from being a carpenter. I ordered my lumber one week and got it the next, which I thought was very prompt. I figure I saved $500, and got better lumber than I would have got from the local mills."

G. Eusey, Ohio.

~

Did It All Himself

"I did all the work myself except plastering, for which I paid $75. Our Liberty is certainly a 'paradise' of a home. The disappearing stairway is working like a clock."

G. Lorenz, Minn.

~

Got Along Fine

"I never tried to read blue-prints before, but I got along very well. There is no doubt but what every piece fits in the right place. I didn't have to buy a thing extra."

C. A. Riester, Ind.

~

Carpenter Surprised

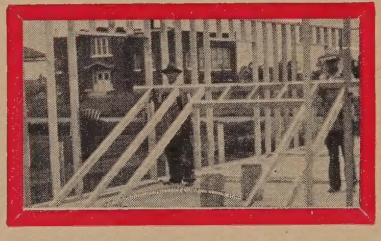
"Our carpenter was surprised at the short time it took to put up our house. It took two weeks less time than he had contracted for."

Mr. & Mrs. Arbaugh, Ind.

No Trouble at All

"We had no trouble at all in putting our Liberty house together. Everything was cut to fit just where it belonged. Three carpenters came to see me for the job of erecting the house, and all three said it was as nice material as they ever saw—in fact, a lot better than I could get from the local dealers. Anyone who is handy with tools and can get the help of another person on the heavy work will have no trouble at all in building a Liberty Home."

S. F. Bamford, N. J.



Never Built a House Before

"My wife and I are very proud of our Liberty home, the 'Lafayette'. I built the biggest part of it myself after working hours, and the ready-cut material was very handy and efficient. I might say right here that I am not a carpenter and never built a whole house, myself before, so you see I am very proud of the outcome."

Fred Deighton, Mich.

Father and 15 Year Old Son Did All the Work

"Permit me to state that in my opinion you shipped me last summer the best ready-cut home I ever saw. The materials were of the best lumber I ever cast my eyes on, without knots, and accurately cut to fit. It was a pleasure to build the house. We had no carpenter on the job; my 15-year-old son and I did the work of erecting. It was no trouble whatever to find the various pieces of material which were all carefully numbered and corresponded to the blueprints. Neither my said son nor myself ever had any previous experience in building a house."

J. J. Sharp, Iowa.

~

All Materials Fitted Exactly in Place

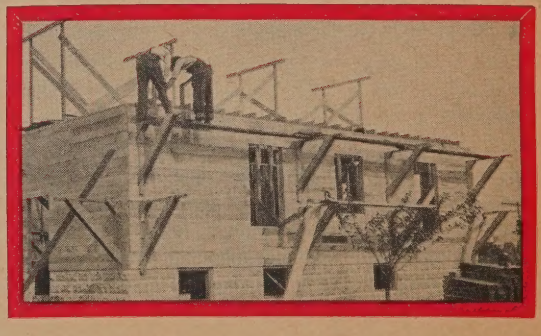
"I have received many compliments on the good grades of lumber that came to me to build my Liberty Home. The material fitted exactly as called for in the drawings. We had no trouble at any time to find each piece to fit where the drawing called for. There were but two of us on the job during construction, showing how simple and easy it was to build. I dare say the greatest factor in our ease of finding each piece was due to the efficient way you have of loading the car. Upon investigation I find I have saved at least 20 per cent thru your system of construction and materials. The above means very much to me."

F. A. Groat, N. Y.

ESTIMATED TIME TO BUILD

Following is given the estimated number of days' time required by one carpenter with two helpers working eight hours a day to build each Liberty Home:

	DAYS		DAYS		DAYS
Betsy Ross	10	Mayflower	25	Senator	17
Cambridge	22	Mt. Vernon	21	Sheridan	14
Chester	10	National A & C.	17	Sterling	11
Columbia	20	National B	14	Tacoma	18
Concord	16	Pilgrim	20	Victoria	22
Delaware	17	Plymouth	22	Wellington A	18
Lafayette	16	Providence	9	Wellington B	21
LaSalle	22				



A Liberty Home Is Very Easy To Build

Starting With The Foundation We Show You How To Do It Step By Step

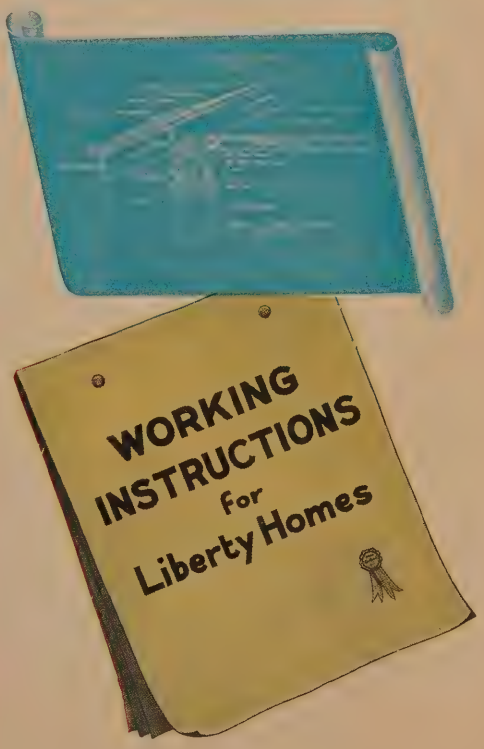
Every step in the building of a Liberty Home is figured out for you, so that all you have to do is follow the drawings and instructions which we furnish you.

Take the foundation, for example. As soon as your order is received, our architectural department will send you the detailed working blueprints and complete instructions on how to build your foundation—either with a basement or without it—in accordance with the soundest building principles. By the time the materials for your home are delivered, your foundation should be completed, ready for your carpenters to start building without losing one hour.

Your House Is Soon Up

Our complete detailed plans and working instructions show you just how to go about it. We send you these working instructions, together with a complete set of blueprints, several days before the materials for your home are to arrive.

You will find the Liberty method of construction very easy to understand. Every step is clearly explained, and the materials numbered to correspond with the working plans and instructions. No time is lost in sorting. Whether you do the work yourself or hire a carpenter, the work of erecting a Liberty Home is easy, simple, and systematic. Your home will be up and ready to move into almost before you know it.



"Blueprints were easy to follow and every piece fits perfectly," writes Mr. Townsend

"I would like to have one of your latest catalogs as I am in hopes that you will be hearing from me again soon, and I would also like to say a few words about the Liberty Homes. I want to say that anyone who wants to save money should built a Liberty Home. The material is all first class and I had enough of everything with some left over. Everyone who has seen it praised it to the highest.

"Your blueprints were easy to follow and every piece fits perfectly, and I am sure I saved at least eight hundred dollars in the deal. We are especially pleased with the honest and square treatment we received.

"Hoping to hear from you again at an early date and thanking you, I remain"

Mr. Chas. H. Townsend.
(New York)

Here's What We Ship You

Lumber Cut-to-fit, ready to erect. Paints, Varnish, Hardware, Nails, Glass, etc.

All Included — No Extras to Buy

1 Center Sill.

2 Floor Joists.

3 Ceiling Joists.

4 Collar Beams where required

5 Rafters.

6 Wall Plates.

For Complete Detailed Specifications See Pages 30-33

7 Partition Plates.

8 Sidewall, Partition and gable studding.

9 Tie Plates.

10 Roof Sheathing.

11 Sidewall sheathing as specified.

12 Partition Furring.

13 All Porch Framing material.

14 Bevel Siding or shingles for sidewalls as specified.

15 Barge Boards.

16 Semi-slate Roll Roofing or Red Cedar Shingles.

17 Interior finish flooring.

18 Porch flooring.

19 Porch ceiling material.

20 Ceiling for Cornice.

21 Lath for plastering.

22 Double cross bridging.

23 Moulding as required.

24 Porch railing and Porch columns as illustrated.

25 Front and rear steps (unless shown in Masonry).

26 All outside trim material including Corner boards, Frieze boards, Facia boards, etc.

27 Flower boxes, outside window blinds, and brackets where shown in illustration.

28 Inside doors including doors for closets.

29 Front and rear outside doors.

30 Outside door and window frames.

31 Window sash already glazed with clear flat drawn glass.

32 All inside door and window trim.

33 Baseboard and base shoe.

34 Main stairway complete as shown on plans.

35 Cellar stairs as shown on plans.

36 All nails in quantity and sizes required.

37 Building hardware including insulating building paper, necessary ridge roll, valley tin, hip shingles, flashing for chimneys.

38 Finish hardware including mortise locksets, hinges, push plates, window hardware fittings.

39 All necessary painting materials, including paint for siding or shingle stain for sidewall shingles, paint for outside trim, porch floor and steps, paint or varnish for porch ceiling, special waterspar floor varnish for all interior finish floors, shellac or stain, and varnish or enamel for inside doors and woodwork, and all necessary oil and turpentine.

WE PAY FREIGHT

At the prices quoted on the homes shown in this catalogue, we pay all the freight charges to any point in the 22 states listed below.

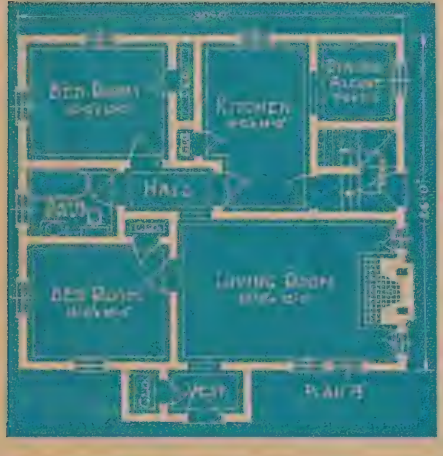
This is the Liberty Guarantee—it protects you absolutely.
LEWIS MANUFACTURING COMPANY

Our Guarantee Protects You!

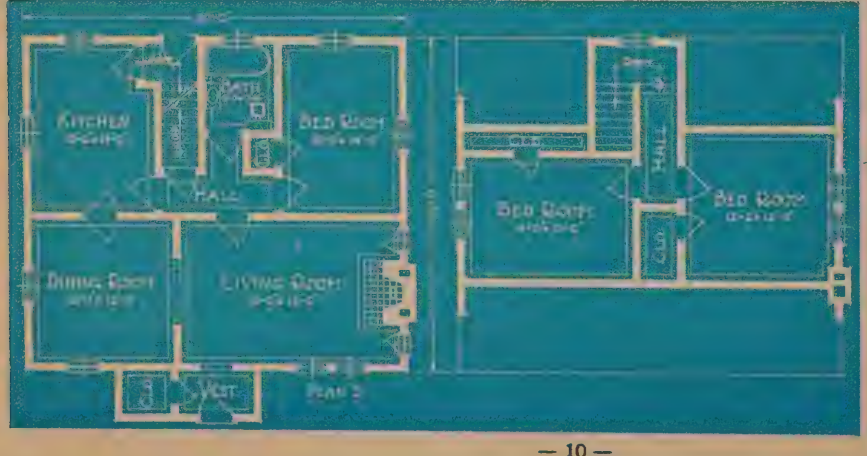
This iron-clad Guarantee gives you absolute assurance you will be satisfied with any Liberty Home you buy.

The WELLINGTON *-A Prize Winner- Attractive -Economical - Well Planned*



The neat English exterior of this favorite design, with the brown stained sidewall shingles, encloses an interior plan that will please the tastes of many modern families. Modern home makers require more in a home than an attractive exterior, as they become more and more economical in the saving of time and steps. Convenience is one of the first requisites of a good design. In both plans of the Wellington we find the happy combination of an attractive exterior and a most convenient plan combined with good taste and real economy.

Plan A is designed for the family requiring only two bedrooms with a large attic space that can easily be made accessible by having an attic stairway leading up out of the kitchen over the present cellar stairs. The small additional cost for attic stairs, extra door, etc., will be quoted on request.



In Plan B the large attic space has been utilized to provide for two bedrooms in addition to the splendid large bedroom on the first floor.

Ornamental window shutters and flower boxes are furnished for front windows as shown in illustration.

Height of ceilings first floor 8′6″, second floor 8′0″.

The CONCORD

A Most Attractive Bungalow Well Planned-Low in Cost

To look at the pleasant exterior design and to visit its well-arranged interior, no one would guess that the Concord is priced as low as the figure shown on our price list.

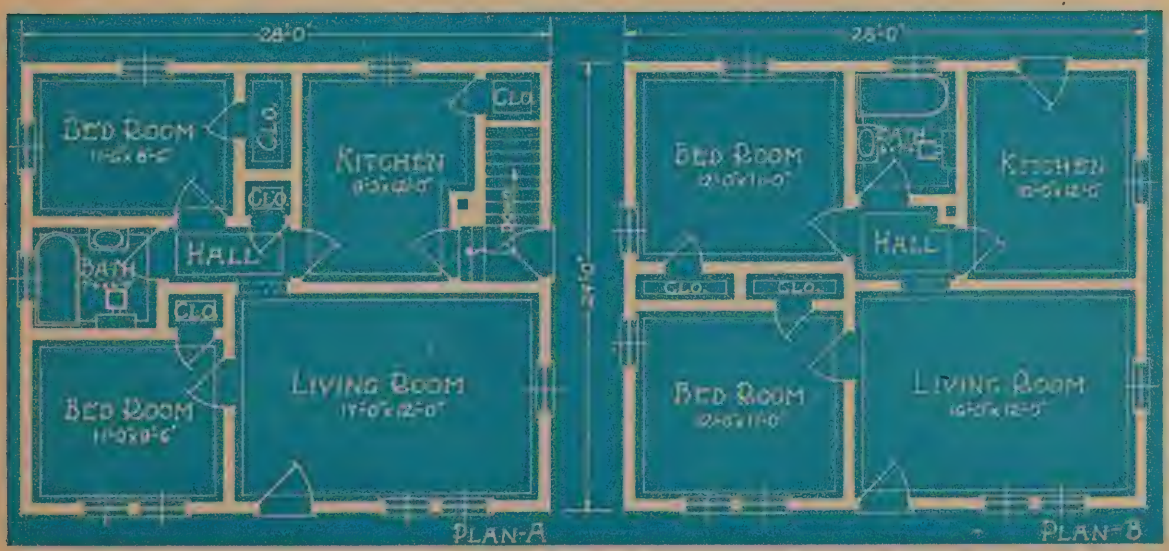
The Concord is a charming home that offers you the choice of two good plans. Plan A is notable for its generous closet space. In addition to a closet in each bedroom, there is a linen closet in the hall and a closet in the kitchen. This plan also includes a cellar stairway.

Plan B takes up the space of two closets and the stairway, and uses that extra space to make the bedrooms larger.

This home uses every inch to good advantage, and whichever plan you choose, you will have a home that will give you much more satisfaction than your money could buy anywhere else.

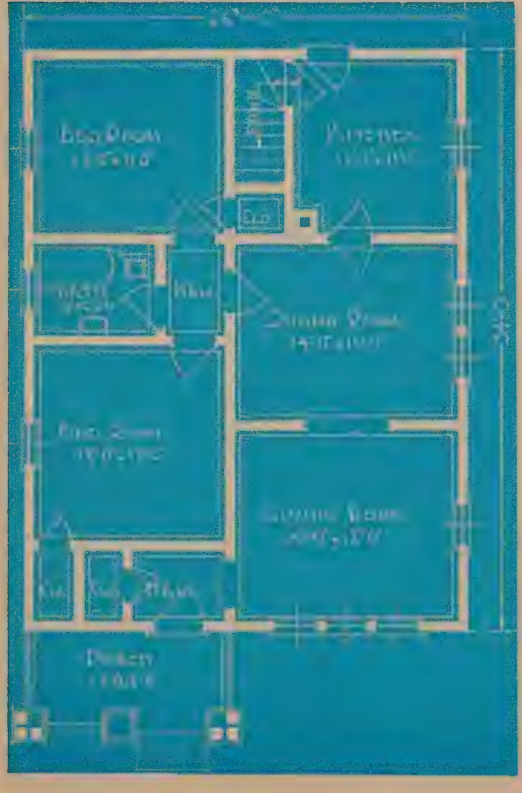
And here's another thing in its favor—the roomy attic can easily be finished off to make another bedroom.

Shingles are furnished for the sidewalls as shown with the color of shingle stain you prefer. Gray stained shingles are very attractive on the Concord. For the outside trim we suggest either cream or white. Height of ceilings 8'6".



The SENATOR

A Wonderful Bungalow at a Remarkably Low Price . . .



This home is a genuine prize winner. At the price we claim it to be the finest bungalow yet designed. The wide roof, the inviting porch, the projecting attic windows with their white trim harmonizing with the balance of the exterior color scheme, the triple front windows—all contribute their share to the beautiful proportions of this popular bungalow. Inside you will find many notable features. The entrance hall with its guest closet for outer wraps. The living room has an unusual abundance of light—four windows—and the wide cased archway connecting with the dining room which is also well lighted, gives it added roominess and brightness. A swinging door connects the dining room and kitchen. The cellar entrance is in the kitchen very handy to the rear door. The two big bedrooms (each with its own closet) and the bathroom, open off the short hall which gives this side of the house much desired privacy.

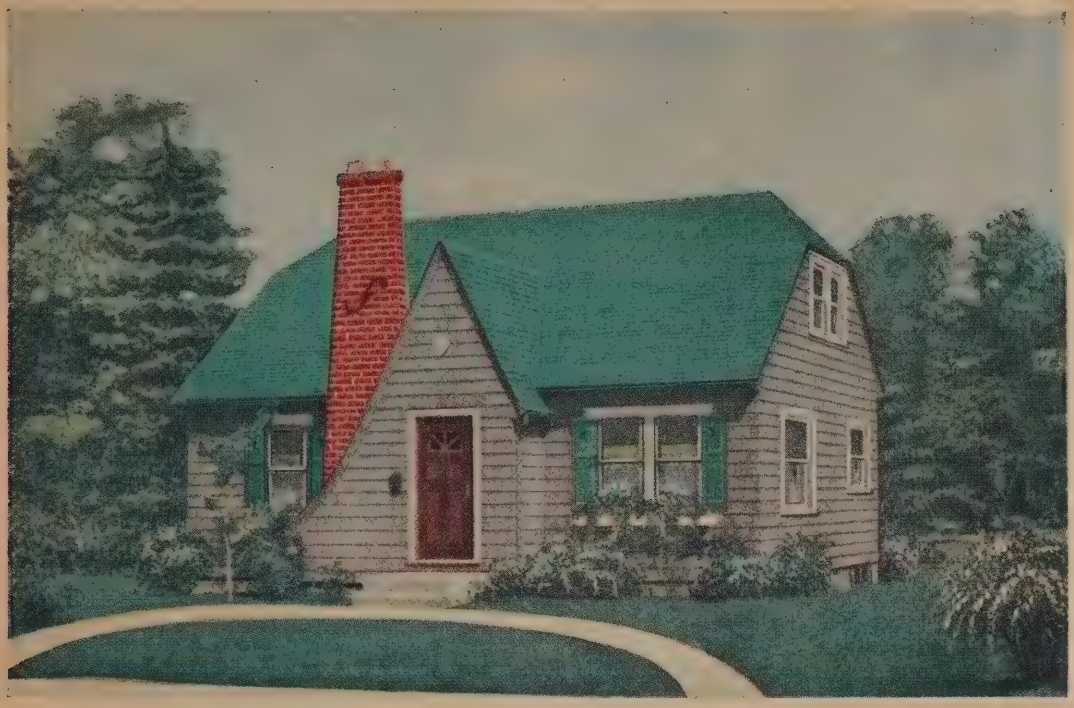
All in all, this plan is one of the big favorites among home-seekers. For the man who desires a modest home we know of no better investment anywhere than the Senator. Height of ceilings 8′ 6″.

B. C. Bradford of Ohio writes —"My Senator is the most convenient 5 room bungalow I have ever been in. I know I saved money. It was easy to build and everything was just as you said it was going to be."

"My Senator is now completed" —writes Mr. Bickel of Ohio, "and I can't thank you enough for the fine lumber and good service you have given me. I intend building several more for rent because I think in a few years they will pay for themselves."

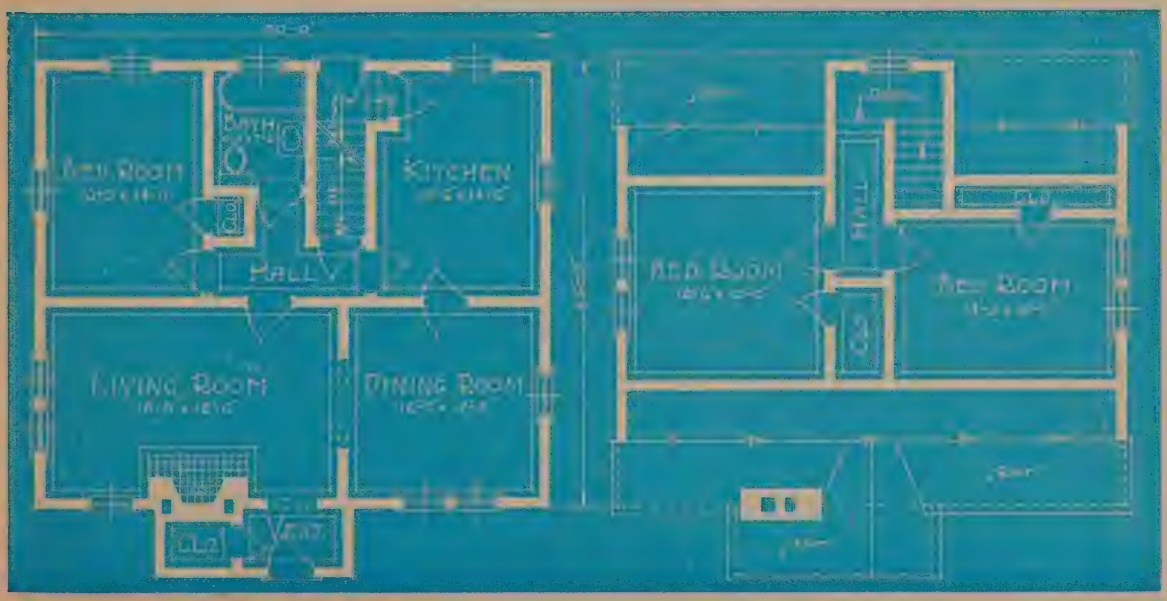
Alternate Plan With 3 Bedrooms

The Senator is also planned with 6 rooms and bath which will appeal to those who have need for 3 bedrooms. If you are interested, we will send the new 6 room plan on request.

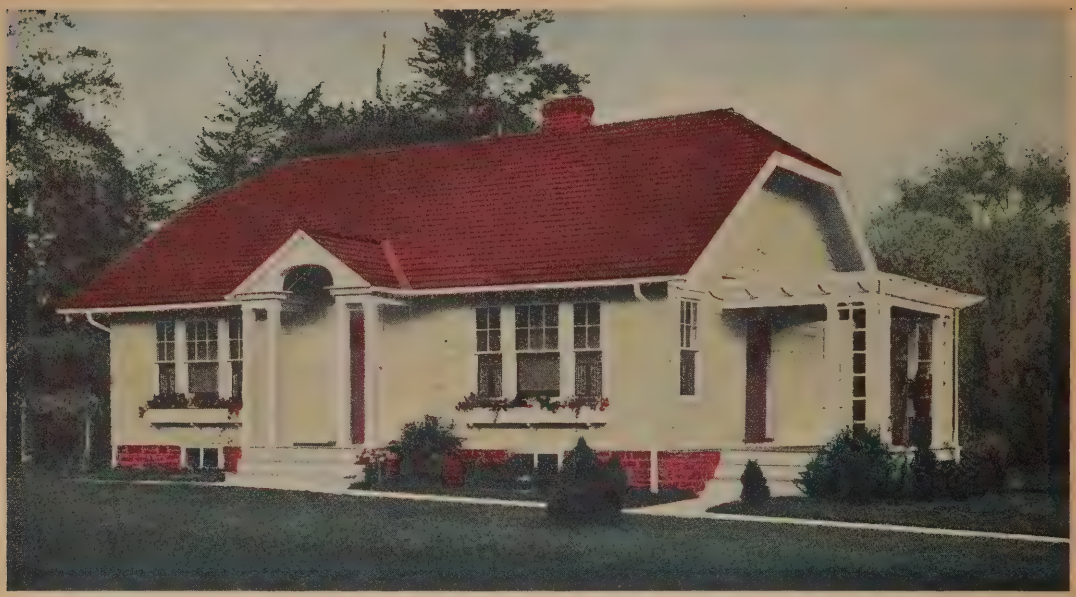


The CAMBRIDGE - *Beauty and Refinement in this Ideal Home*

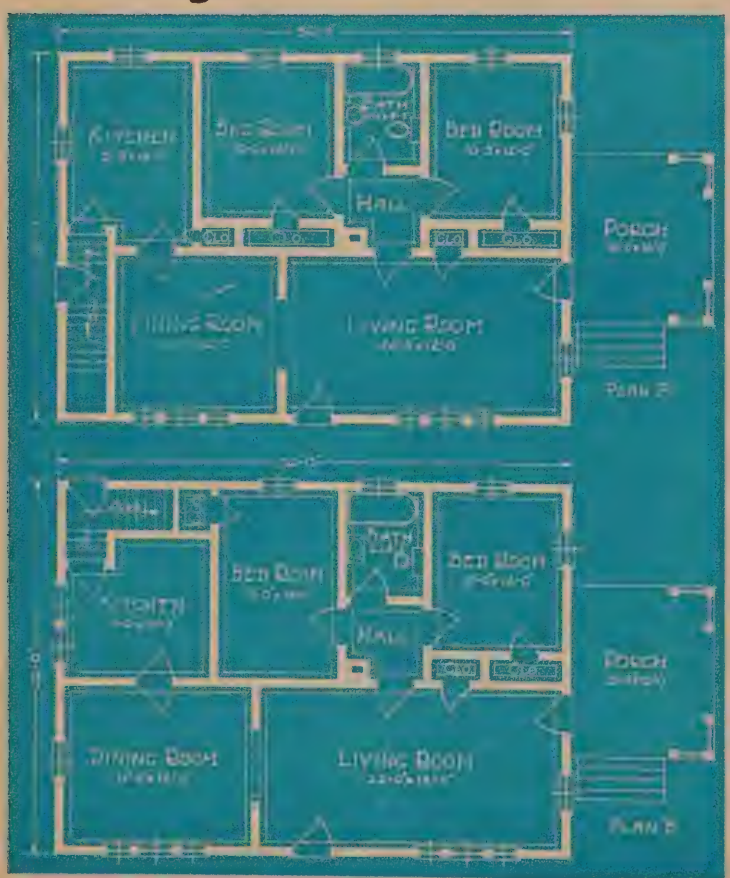
One cannot help but admire the beauty, refinement and restfulness of this lovely design. With its graceful entrance treatment, and the soft gray shingle sidewalls, blending in perfectly with the general exterior design, it is a home that is highly desirable in any locality. Here, indeed, is a home that invites home ownership. In selecting the Cambridge you obtain the perfect combination of an unusually attractive exterior and an ideal interior plan, all at an astonishing low cost.
Height of ceilings first floor 8′6″, second floor 8′0″.



The LA SALLE



Home Owners call this Colonial Bungalow "Just Perfect"

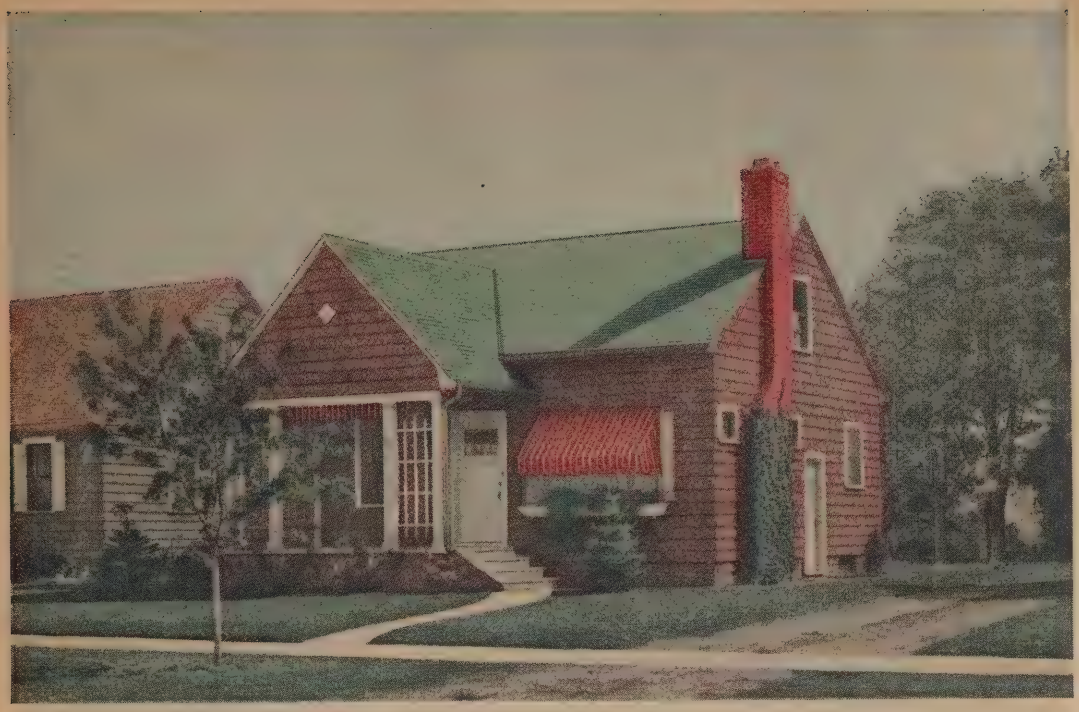


The LaSalle is one of our newer designs, but it has quickly taken to the hearts of home builders. There are good solid reasons back of its immediate and enthusiastic acceptance, of course. Its beautiful exterior takes the eye, and its exceptionally well arranged floor plans make it one of the finest five-room homes ever designed. The LaSalle has several distinctive features that mark it as a notable contribution to American home building.

In addition to the front porch size 8′ by 4′, a perfect colonial entrance, there is also a side porch 10 x 12 feet. Can't you just imagine this porch enclosed with rambler roses running up the trellises and perhaps a lilac bush or two?

Every housewife takes delight in having plenty of closet space, and this is a feature of the LaSalle that is sure to please. All in all, the LaSalle is about as perfectly designed a bungalow as any home builder could wish for. It will give you the right combination of coziness with roominess, comfort and handsome appearance, and its low price will be the most welcome surprise of all.

Height of ceilings 9 feet.



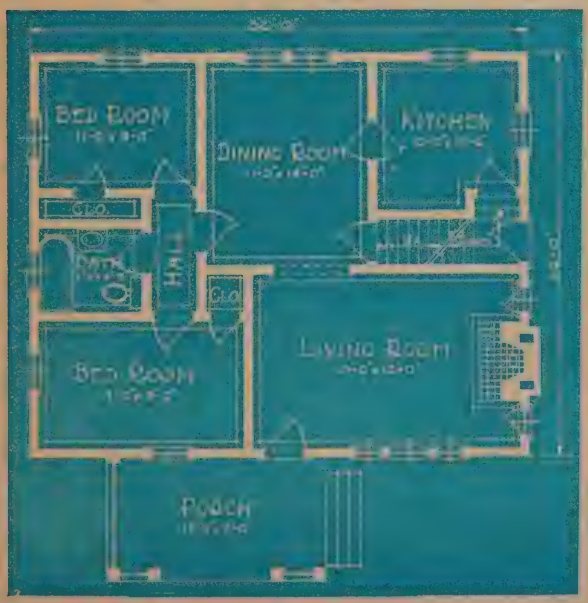
The TACOMA *-Charming to look at-Easy to live in-A Perfect Home*

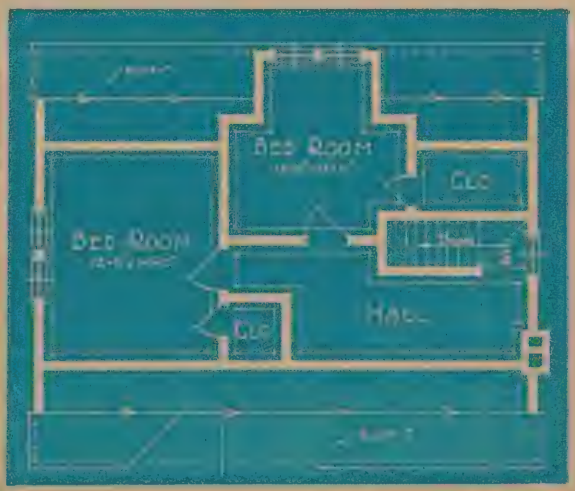
We take a great deal of pride in presenting the Tacoma as we feel that it will meet a long felt want in the hearts of many. It not only has beauty in every detail of its exterior, but an exceptionally well laid out interior plan as well.

One of the features of the Tacoma which appeals to many home builders, is to have a home in which you have a complete living arrangement on the first floor and have it practical at very little extra expense to have additional rooms finished off on the 2nd floor at some future time.

The regular price of the Tacoma includes the stairway to attic, 2x8″ 2nd floor joists, windows as shown and attic flooring so that the arrangement shown on the suggested plan below can be carried out at a minimum cost. The price of the materials needed for completing the 2nd floor plan as shown will be quoted on request.

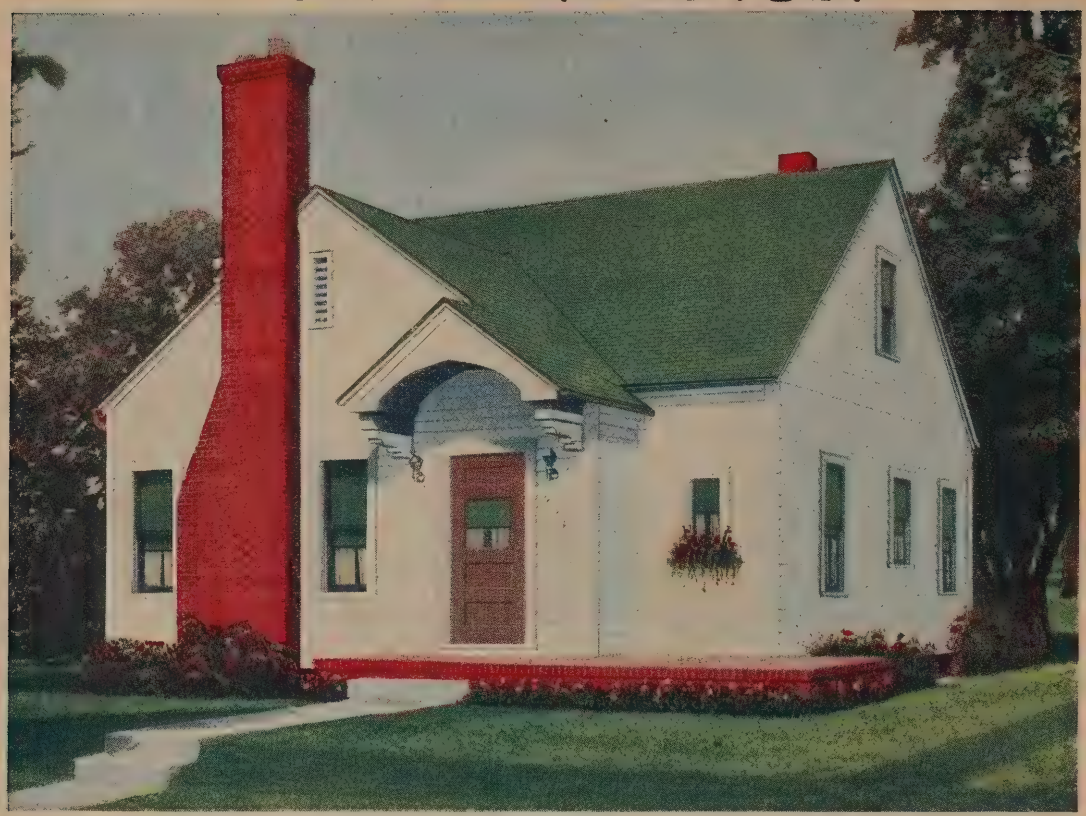
Height of ceilings first floor 8′6″, second floor 8′0″.



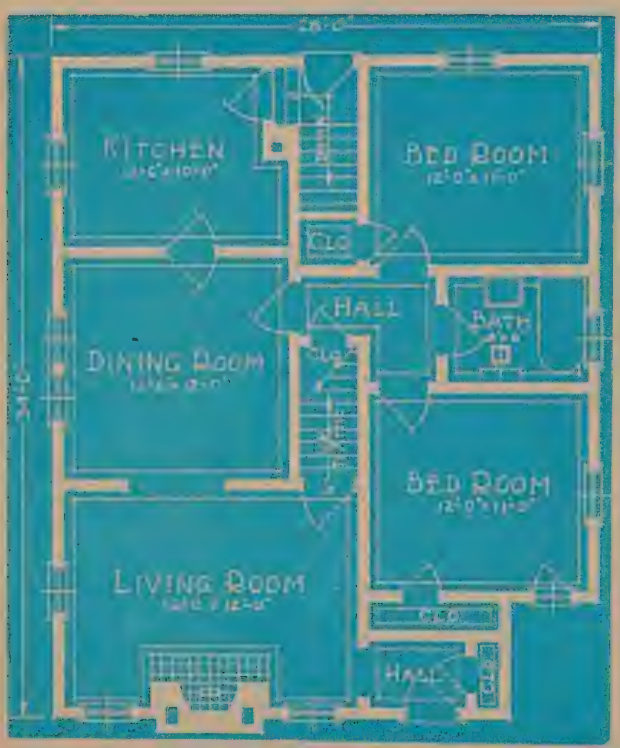


The exterior walls of the Tacoma are planned to be covered with clear Red Cedar shingles, stained a rich brown. For the flower boxes, window shutters, porch columns, etc., we suggest a light cream color that will harmonize nicely with the brown shingles.

The MT. VERNON



A Home You'll Love to Live In



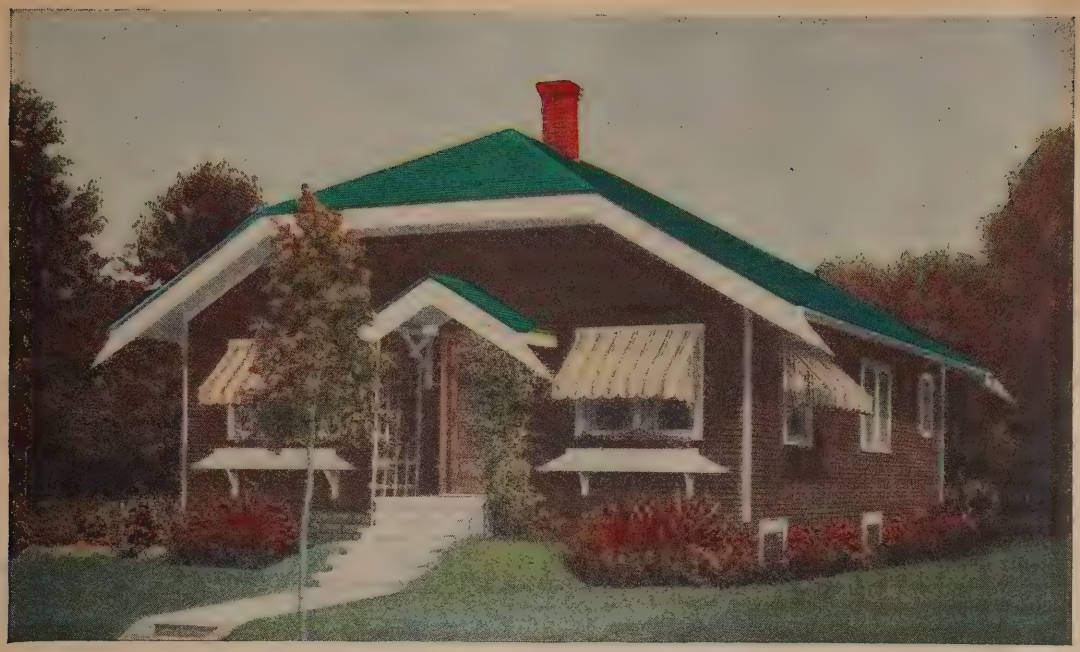
Height of ceilings 8′ 6″

The Mt. Vernon is one of the most interesting new designs of the modern architectural period—beauty —convenience — practicability — roominess — at low cost. Few homes of this type offer as many outstanding features as this.

As one enters the Mt. Vernon he is at once impressed with its air of roominess. First there is the convenient entrance hall with its own closet for outdoor wraps. Then the living room, ideally suited for a fireplace. If you do not care for a fireplace, a triple window can be arranged in place of the two single windows and with a suitable flower box for this window the appearance will be quite attractive.

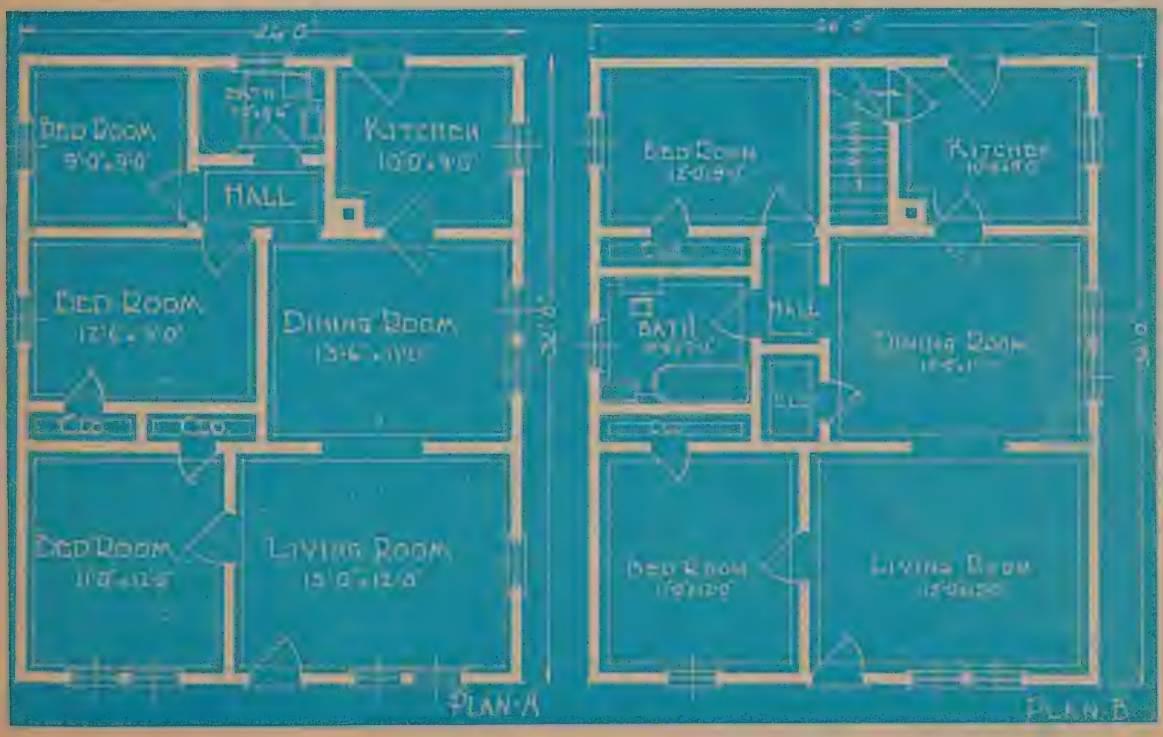
The stairway to the second floor leads up out of the living room making the spacious attic available for use as needed. Two additional bedrooms may be finished off on the second floor at a small extra cost. The construction of the Mt. Vernon will permit the finishing of these extra rooms at any time.

Although it is not an expensive home to build the Mt. Vernon is a most desirable home with its attractive exterior combined with an ideal floor plan arrangement. One Mt. Vernon owner writes us: "I bought a Liberty Home because I knew I was getting more value than elsewhere. There is a new house on the lot next to mine and while it is a nice little house which cost a great deal more than my Mt. Vernon I wouldn't swap for $2,000 to boot."



The LAFAYETTE—A Prize Home—One You'll Be Proud to Own

This artistic bungalow has always appealed to those who want a large well-planned home yet must keep the cost down as low as possible. Although the Lafayette has considerable floor space, much real comfort, and genuine charm, it is priced so amazingly low that many people ask us how we do it. Certainly they find no signs of economizing in the quality or quantity of materials, no skimping anywhere. The economy is achieved in our own plant management. You enjoy the perfect fruit of our efforts—a home worthy of harboring your finest ideals, one that fulfills your most cherished dreams; at several hundred dollars less than you expected to pay. Height of ceilings 8′ 6″. See detailed specifications beginning on page 30.

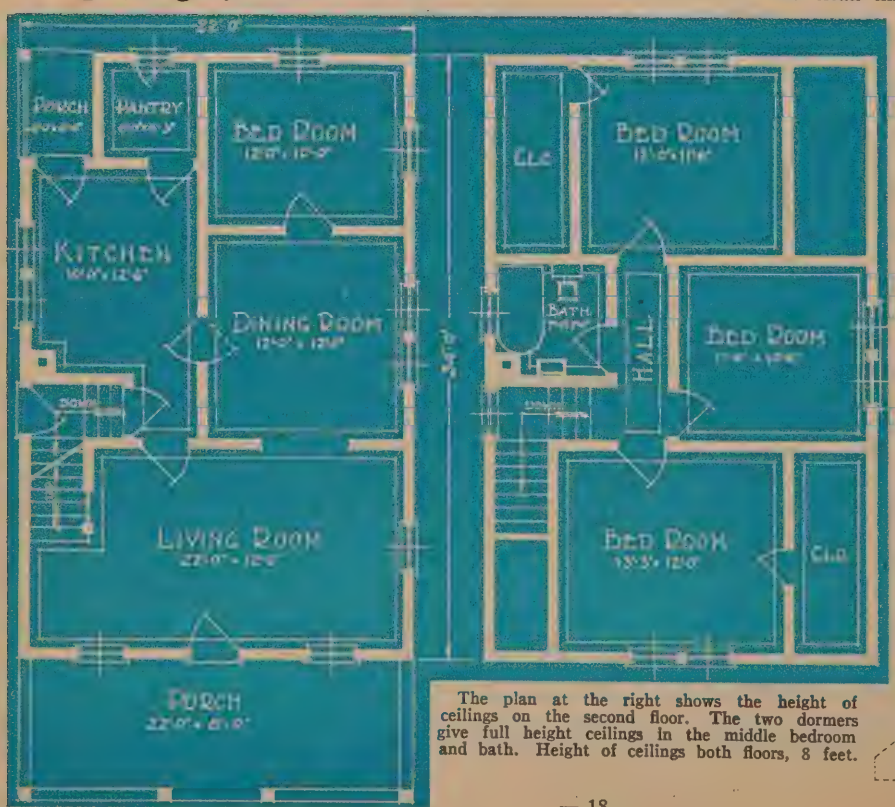


The MAYFLOWER

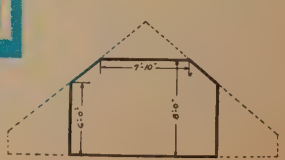
A Wonderful Semi-Bungalow with 4 Bed Rooms

The Mayflower is a home you will be proud to own and live in. The clean lines of the exterior make it most attractive to the eye. And the floor plans are excellent. A splendid bedroom downstairs is one feature which especially appeals to a great many. Then there is the well lighted living room, dining room, and the kitchen with its convenient pantry and rear porch all on the first floor, with three excellent bedrooms, bath and plenty closet space on the second floor. It is rare to find such a complete design as the Mayflower at such a low cost to build.

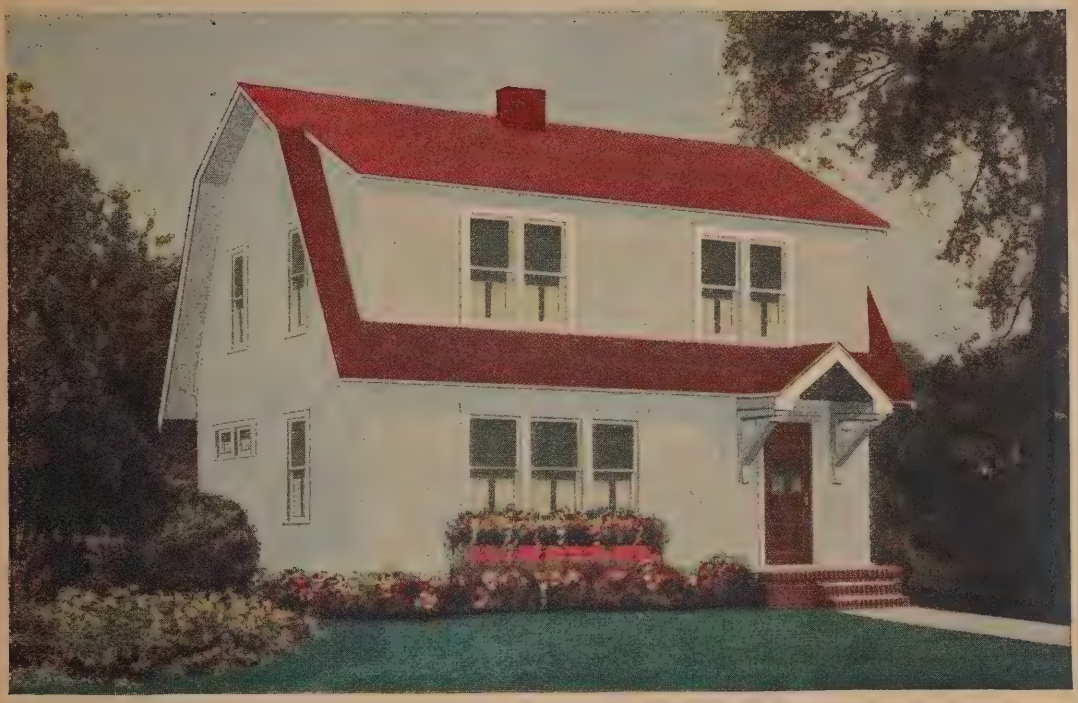
No investment could be better than a home like this. It is a home that is easy to love, easy to live in, and when you wish, easy to sell at far more than its cost.



The plan at the right shows the height of ceilings on the second floor. The two dormers give full height ceilings in the middle bedroom and bath. Height of ceilings both floors, 8 feet.



The VICTORIA



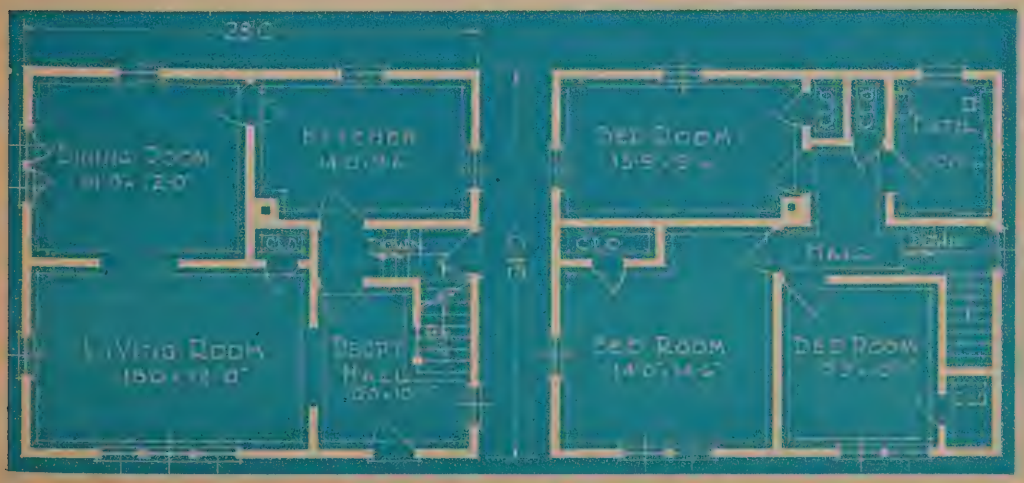
A 2-Story Colonial of Rare Charm

This beautiful Colonial home has the exterior grace and dignity and the interior spaciousness that usually come only in homes of much higher price. It is this combination of charm and economy that makes the Victoria a popular design with home-builders centuries after its model first flourished in the hospitable Colonies.

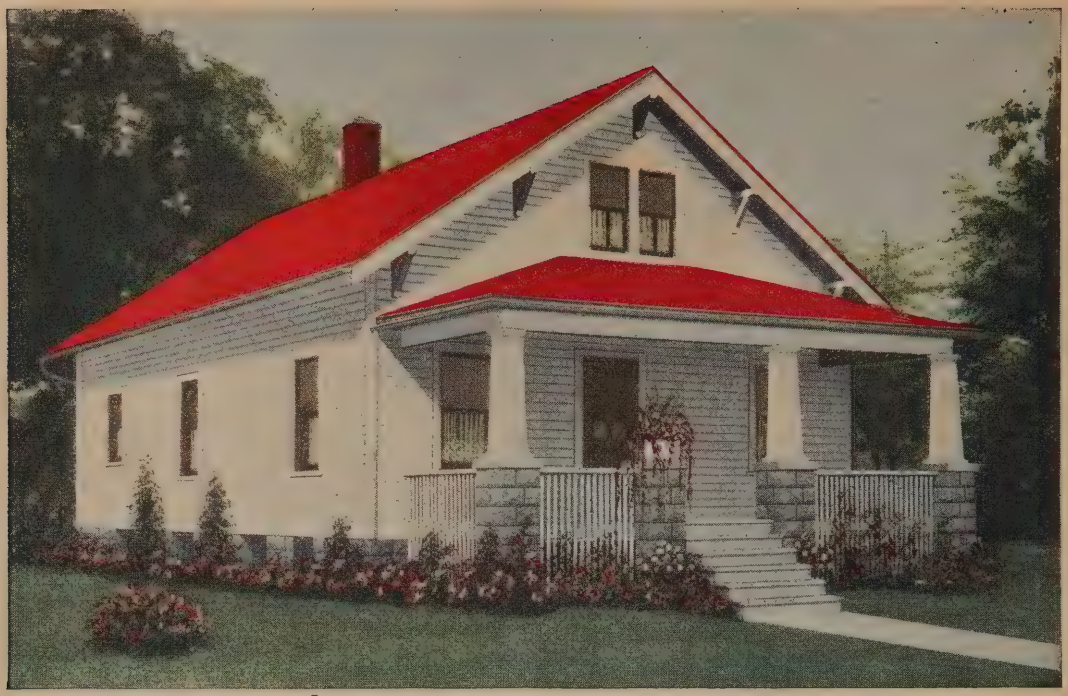
From the Colonial entrance you step into a roomy reception hall. The open stairway leads up from it, the stairs to the grade landing and basement leading down from the kitchen hall. Careful attention has been given to the large restful living room and to the dining room which occupies a pleasant corner of the house. The kitchen is handy to the front door as well as the grade entrance so conveniently located at the side.

The good architecture which leaves no wasted space is apparent also on the second floor. Here you have three splendid bedrooms each having a roomy closet, the bath with plenty of elbow room and the handy closet off the hall for towels and linens.

It isn't very often that a home having the quality and character of the Victoria is offered at a price that is within reach of a large number of home builders. At the low cost of the Victoria, so many home builders have found it to be their ideal home, that it has become one of the most popular two-story homes we make.



One Victoria Owner writes: "I am well pleased with the choice I made, as the Victoria is all that it was represented to be, well planned, bright and cheerful, and I cannot say enough in praise of the beautiful lumber provided."



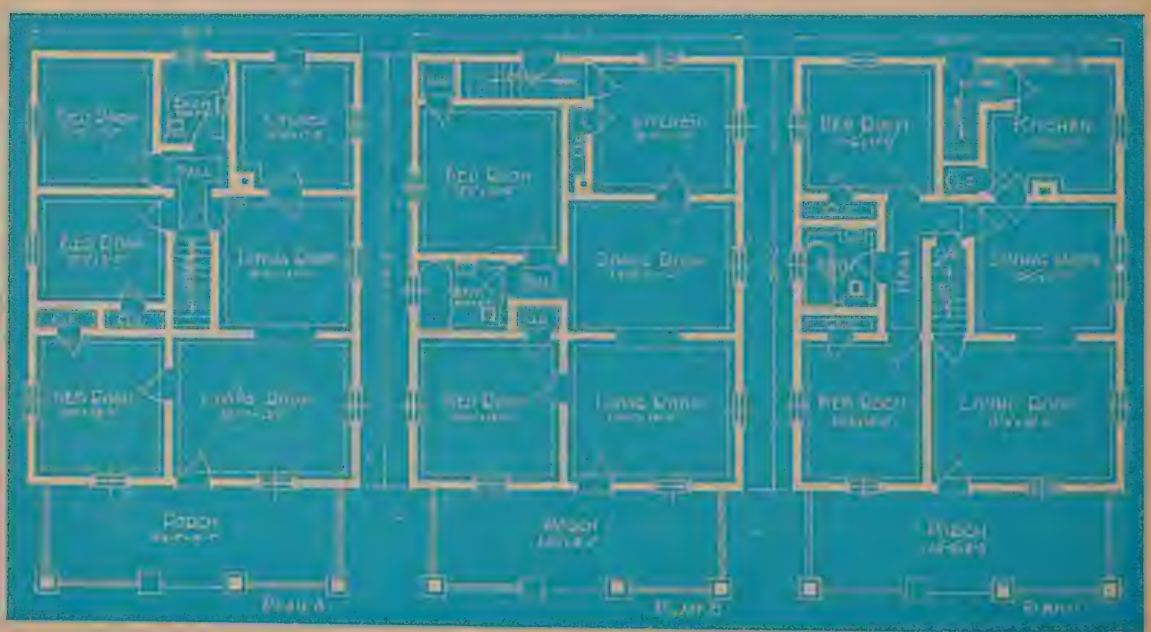
The COLUMBIA *-Attractive Well Planned -Low in Cost*

Here is a masterpiece of designing! In beauty, in layout, in size of rooms, it is the ideal home for the average family. There is good solid worth in every inch of it. Even to the big wide porch, the entire home has that comfortable roominess which all folks appreciate so much.

All in all, the Columbia is a gem of a house. It combines most, if not all, of the qualities of that "Dream Home" which you have so long planned. Three splendid plans to choose from and the price without doubt is the most amazing low figure ever placed on a home of such quality, size and beauty.

The large attic space is a feature that is especially desirable. The height of attic from floor to ridge of roof is approximately 9½ feet making it possible to finish off two extra bedrooms should they be needed. The attic stairs can be arranged to lead up over the cellar stairs in either plan and will be furnished at a small additional cost.

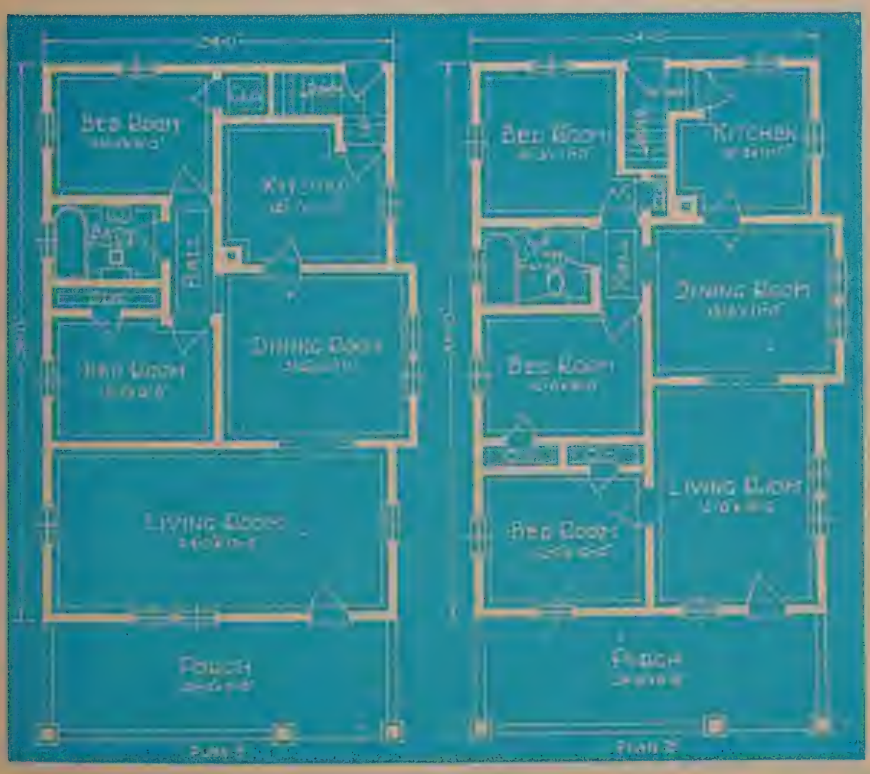
Height of ceilings first floor 8′ 6″.



The PILGRIM

This beautiful bungalow has a host of friends, and is indeed worthy of their admiration. Its exterior shows a distinct character of its own, but the inside arrangement of rooms in each of the two floor plans, the placing of the windows, the closets, all have the solid, substantial virtues that make a home practical to live in. The Pilgrim is a perfect example of how it is possible to have the desirable features of the more expensive homes at a low cost.

Two floor plans are offered, plan A with two bedrooms and plan B three bedrooms. In plan A the living room extends across the entire front and if you desire a fireplace, an ideal place for it would be in the left wall where the single window is now located. Should you intend to build a fireplace we will omit this window and furnish two smaller casement windows, one for each side of the fireplace, at no extra cost.



You have only to examine the floor plans of the Pilgrim to see how well family's needs have been provided for. You have only to read the complete Liberty specifications to know that the materials are all of the finest quality and that the sound, durable construction will insure your satisfaction in this wonderful home throughout the years to come.

The Pilgrim is, without doubt, one of the most appealing homes in our entire catalog, both in outward appearance and convenient room arrangement.

Height of ceilings, 8 feet 6 inches.

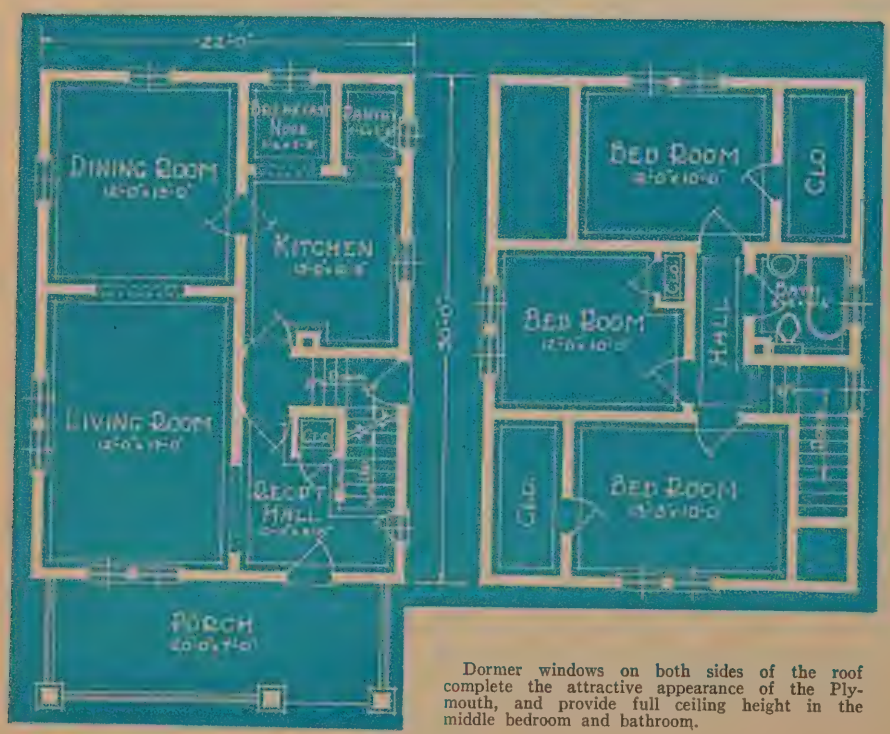
The PLYMOUTH

The Plymouth becomes more popular every year. It is a striking example of solid comfort, correct design and enduring construction, being as cheerful inside as it is pleasing outside.

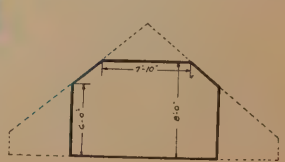
The interior arrangement has been planned with all the understanding and careful attention that characterizes Liberty Homes. As one enters the reception hall and glances through the two wide archways into the dining room he is impressed with an air of roominess. Then as he passes on through into the kitchen which has so much desirable wall space and sees the cozy breakfast nook and the convenient pantry, he has the feeling nothing has been overlooked.

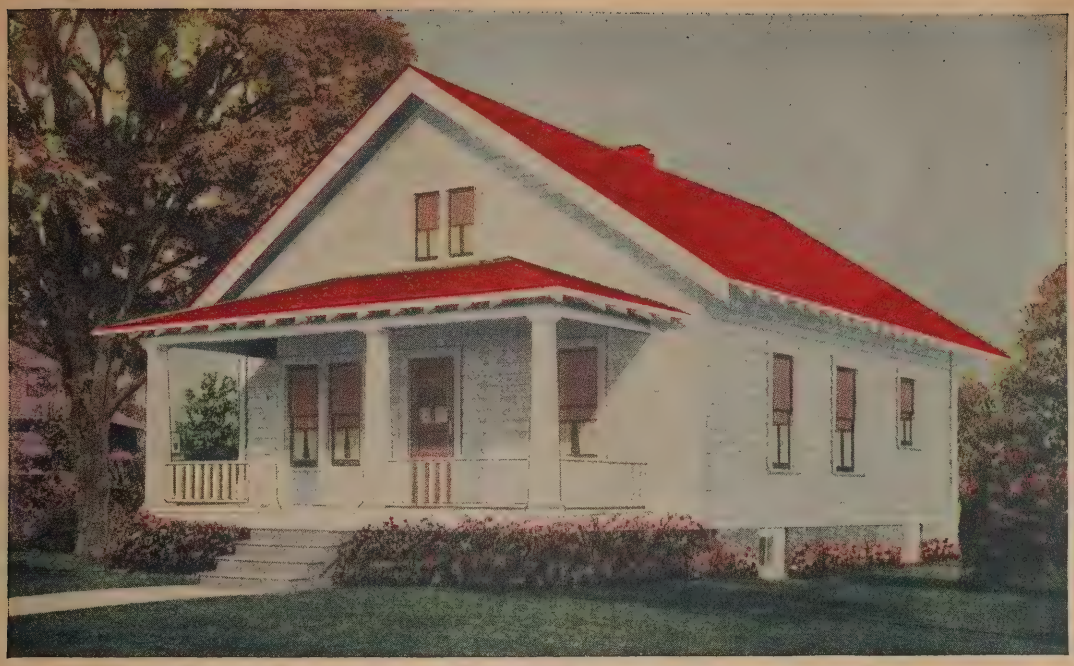
The second floor plan will be just as delightfully surprising as the first floor. The large bedrooms give no indication that the Plymouth is a semi-bungalow design except for the slight slope of the ceilings. The plan at the bottom of the page shows the height of the front and rear bedrooms. Height of ceilings, both floors, 8 feet.

With all the splendid features offered in the Plymouth combined in a home that costs so little to build, it is no wonder that this home has such a host of friends. It is as sturdy in construction as it is in appearance.



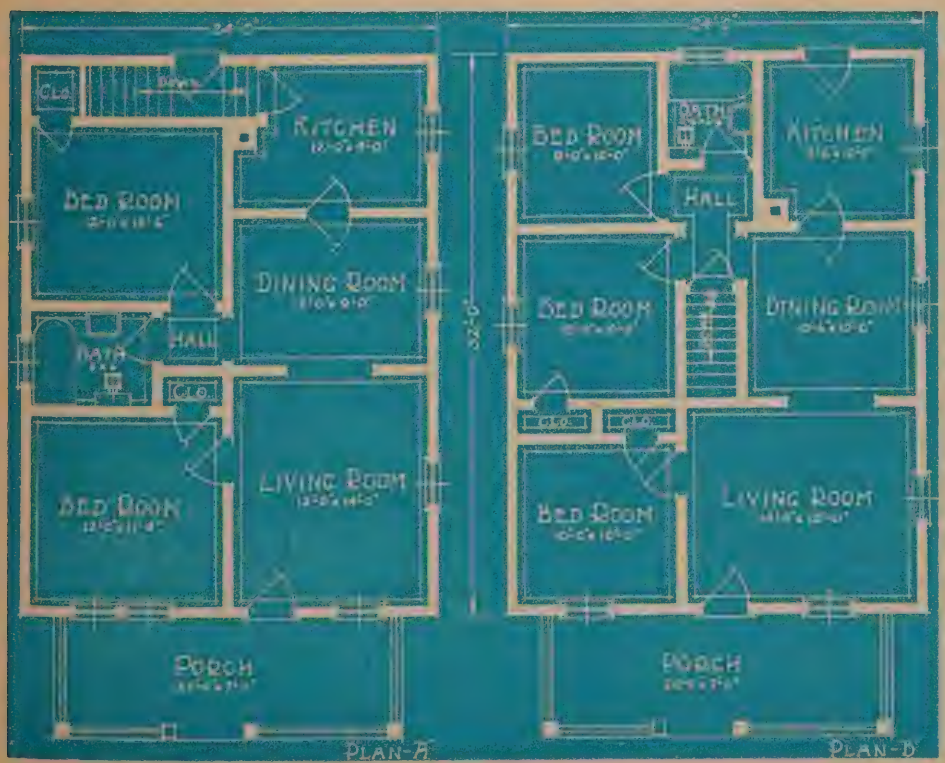
Dormer windows on both sides of the roof complete the attractive appearance of the Plymouth, and provide full ceiling height in the middle bedroom and bathroom.





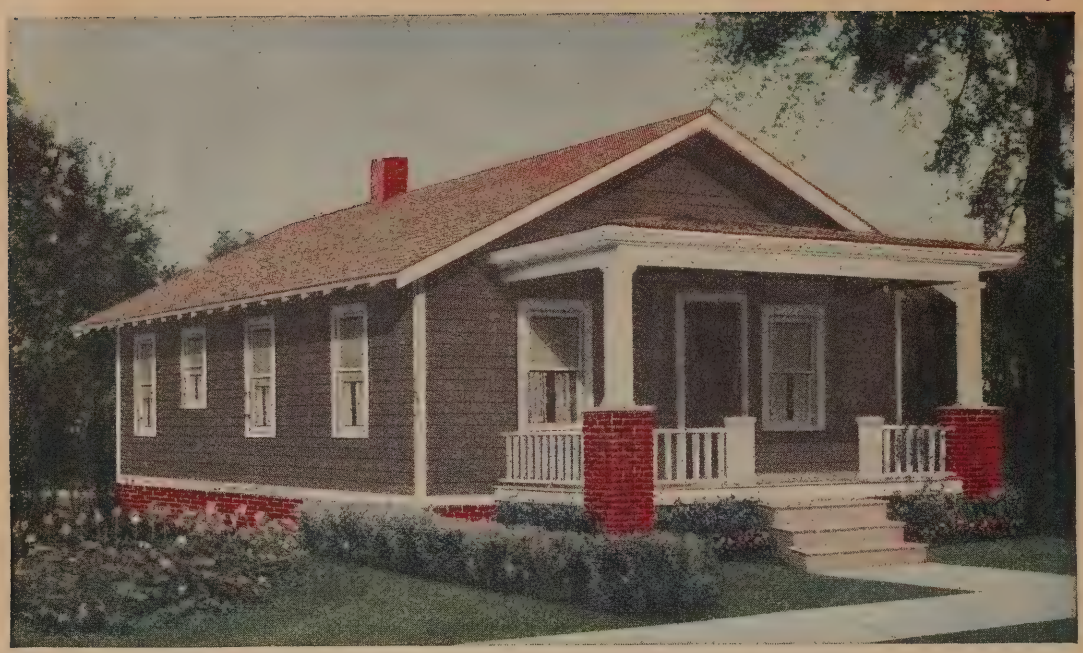
The DELAWARE - A Big Favorite With Homebuilders Everywhere

It is easy to see why the Delaware is a big favorite with home-builders everywhere. In appearance, arrangement and size of rooms—it is an ideal home for the average family. The big porch is very convenient. There is also the advantage of the large attic space which can be finished off any time later on to give two additional bedrooms at a very small cost. If you desire a home that will give you a great deal of comfort and convenience at very low cost, then we heartily recommend the Delaware.



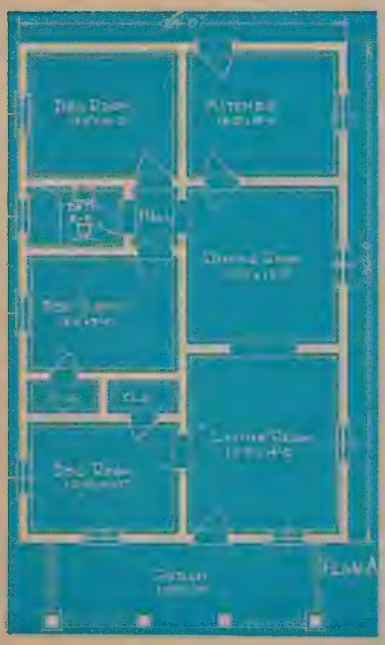
Two floor plans are offered. Plan A gives a living room with good wall space, a dining room, kitchen, two roomy bedrooms each with its own closet, a bathroom, hall and grade cellar stairs. Plan B has three well arranged bedrooms, living room, dining room, kitchen, two closets, a bathroom, hall and cellar stairs. Prices include 20′x7′ porch as shown. Height of ceilings, 8′ 6″.

Note:—If you wish to make use of the large attic space, which has a height of over 8 feet, we will furnish complete attic stairs over the cellar stairs in either plan 2x6 attic floor joists with flooring to cover a space of 14 feet wide through center of attic, at a small additional cost.

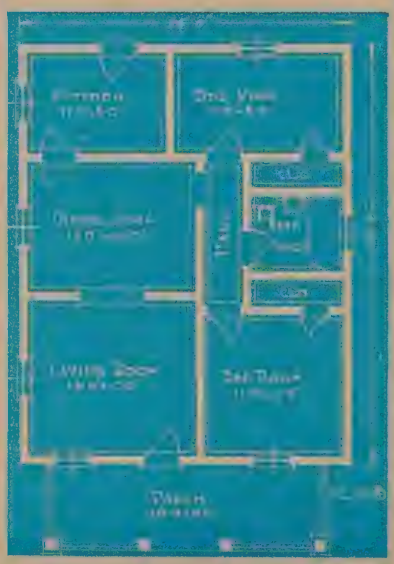


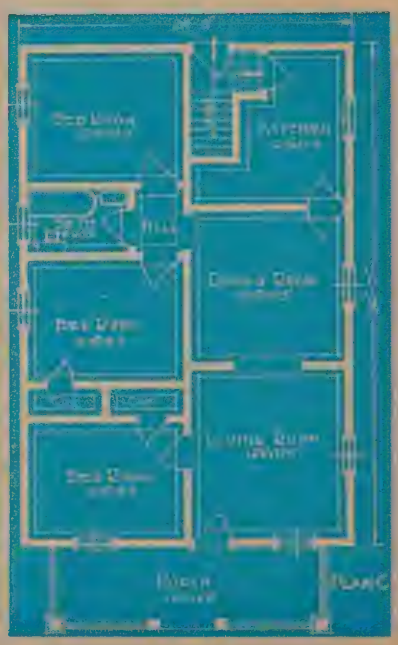
The NATIONAL—An Ideal Home Design Brings Happiness to Thousands

It hardly seems possible that such a good-looking, well-proportioned house is available at such a remarkably low price. How can we do it? In the first place, this design meets a universal need. Therefore it is manufactured and sold in large numbers. Families in every section of the country want a roomy house at low cost—but a home also with quality construction, attractive exterior, skillfully laid out interior. You have only to look at the floor plans to see how the family's needs have been provided for; you have only to study the guaranteed specifications beginning on Page 30 to understand the truly fine quality of materials; the outside design speaks for itself. If you need a home of the National type, study the three plans carefully—one of them will surely give you lasting satisfaction, because it is bringing happiness and contentment to every home owner who ever built a National. Height of ceilings 8′ in all plans. Porch 20′x6′ furnished with all three plans as shown.



"I want to let you know the National is completed and I never saw such a perfect fit. Have been a carpenter for 20 years and it is beyond my expectations by far."
C. E. Bennett, Kentucky

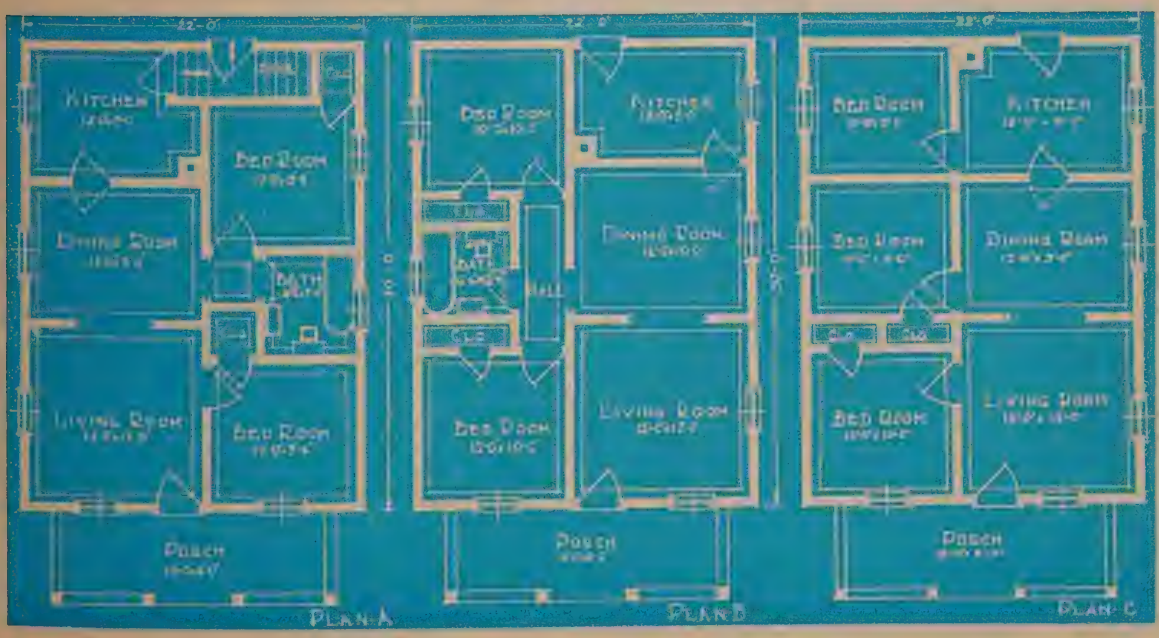




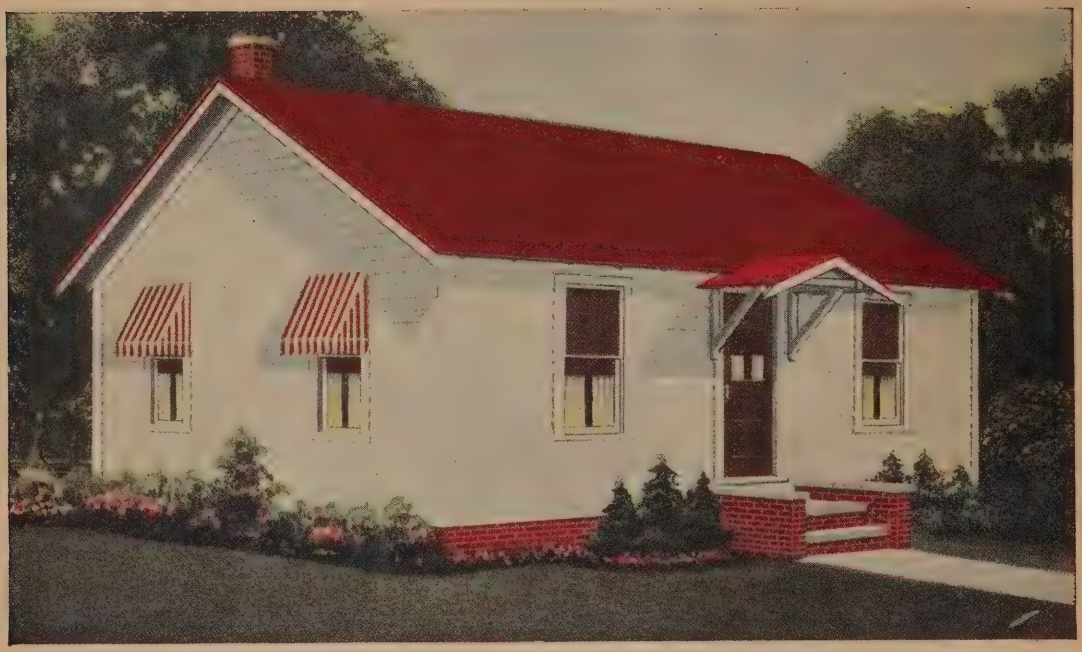
5 Large Rooms, Bath, Hall, Closets, Big Porch

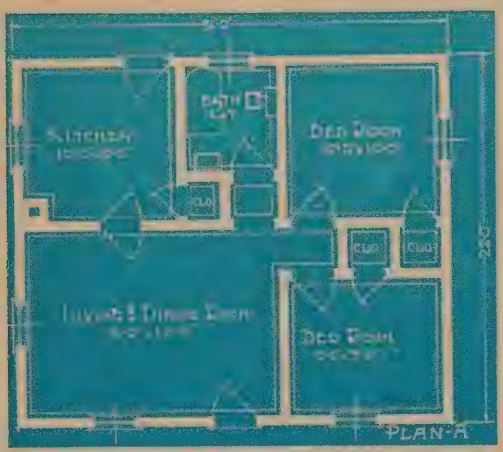
The SHERIDAN—A Universally Popular Home—3 Model Plans

Right before you is positive proof that you can combine beauty and practicability in a home of modest cost. Few homes offer so much comfort and satisfaction. Its artistic exterior gives a distinct impression of quality, enhanced by the pleasing roof lines and wide, hospitable porch. And inside, the Sheridan fulfills all the promises of its handsome exterior. The rooms in all three plans are spacious, conveniently arranged, comfortable. Plans A and B each have five splendid rooms, living room, dining room, two bedrooms, kitchen; also two closets and bathroom. In Plan A the cellar stairs is furnished leading down from the kitchen to the grade landing and basement. Plan C has three fine bedrooms with two good closets, pleasant living room, dining room and kitchen. The porch size 18′x6′ is furnished as shown—Height of ceilings 8′ 6″.



The BETSY ROSS

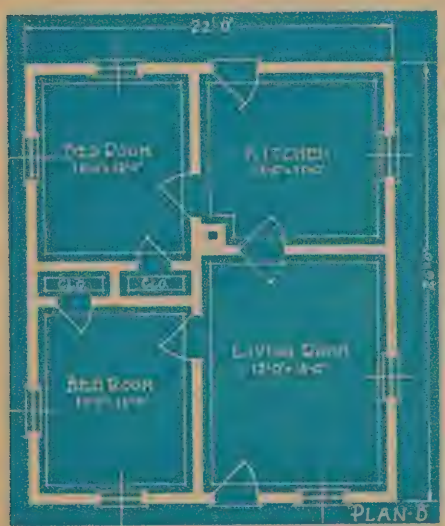


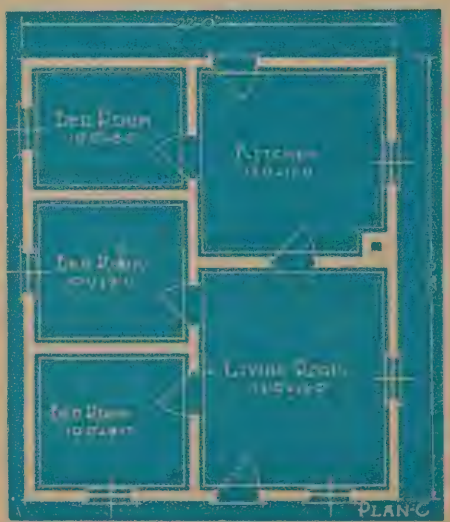


The Betsy Ross proves that you don't need a lot of money to own the kind of a home that meets your ideas of size and comfort and sturdiness. The Betsy Ross is well-balanced in appearance, and is a home you will be proud to call your own. Notice the splendid large living room in Plan A, the roomy bedrooms, each with its own closet, the comfortable-sized kitchen with its closet, the conveniently located bathroom off the hall. Plan B features two large bedrooms each with its own closet, a comfortable living room and kitchen. Plan C is designed for the family that needs 3 bedrooms and yet must have a large living room, as well as an extra large kitchen.

If you feel that a larger porch would be desirable, any one of the other porches may be substituted at the difference in price as explained on page 34.

Height of ceilings, 8'. See guaranteed specifications beginning on page 30.





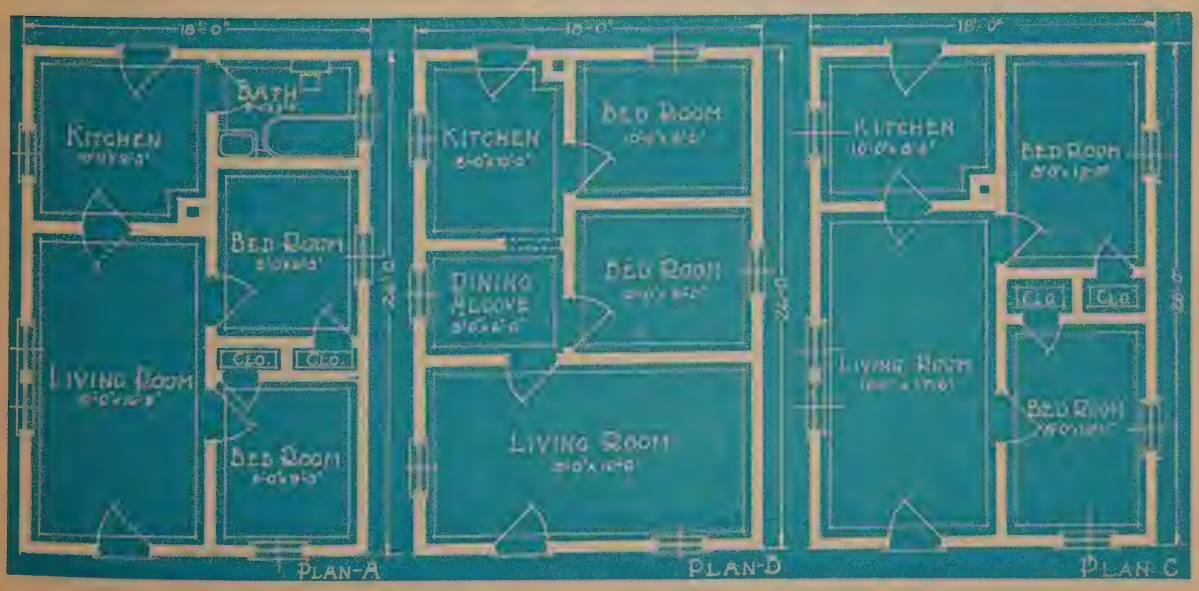
"Everyone that has seen our Betsy Ross sure likes it and wants to know where we got it. We saved at least $500.00 to $1,000.00 and besides everything was just as represented."

Claud M. Brummet, Ill.

The CHESTER - 3 Wonderful Interior Plans Unequalled in Value

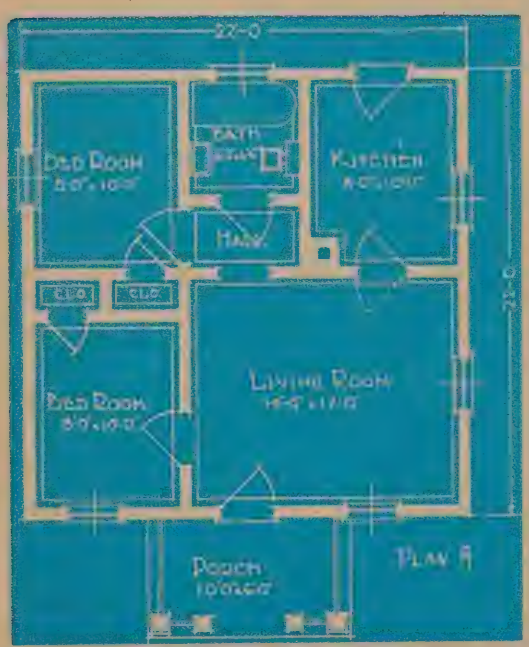
The Chester drives home the value of good architectural service in the building of a modest home. At a price which enables you to start home-ownership with the very smallest of accumulated savings, you have your choice of 3 splendid interior plans. They are as carefully planned to meet the needs of family life for comfort, convenience and "livableness", as homes costing three times as much.

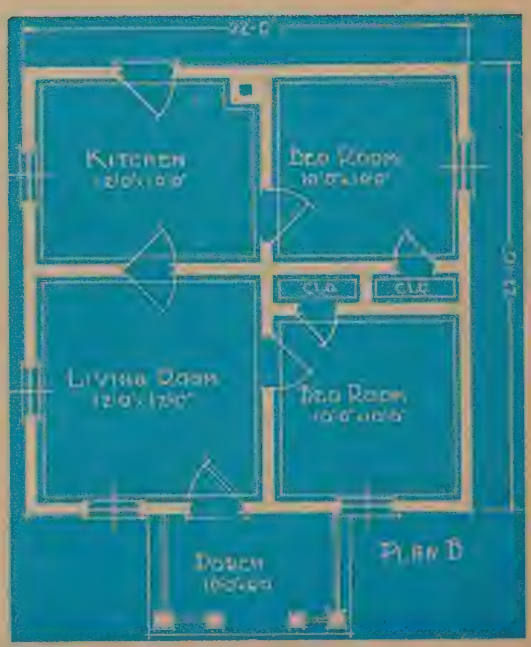
The illustration hardly does justice to this home because it cannot show its sturdy quality. You will see from the floor plans that all three plans have the first essential of a real home—a comfortably large living room. Plan A has its large living room and kitchen with two bedrooms, bath and two closets. Plan B provides the feature of a convenient dining alcove besides its large living room, kitchen and two bedrooms. Plan C is intended for the family needing larger bedrooms. Height of ceiling, 8'.

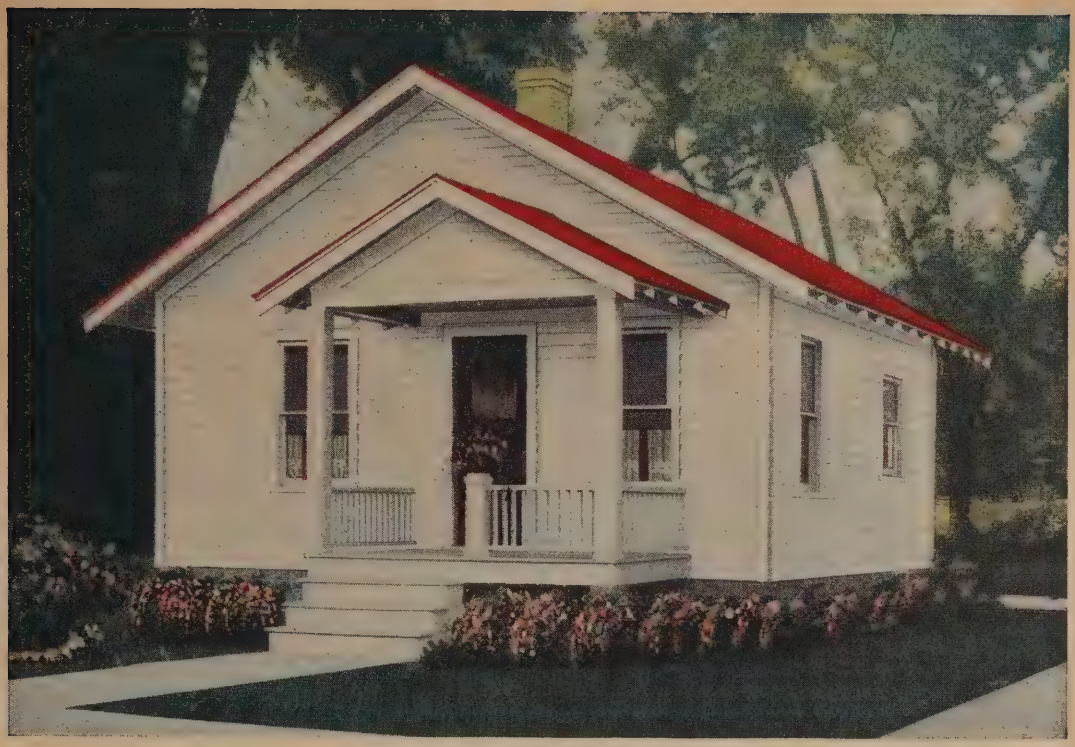


The STERLING - A Home of True Worth - Exceptional Value

Here is a home we are sure you will like. It offers so much home comfort for your investment, that nobody would ever believe you didn't pay several hundred dollars more for it. Look at it inside and out. Not many frills, but a good substantial design. A porch with a gable roof that repeats the general roof line, and gives the house additional character. The two interior plans hold a lot of comfort for your family. Plan A has a living room large enough to accommodate many social gatherings of friends; a convenient kitchen, bathroom, hall, two bedrooms, two closets. Notice how the hall gives the rear bedroom the quiet and privacy that every home needs. Plan B has a good-sized living room, a larger kitchen, two large bedrooms, and two closets. Porch included in price of either plan. Height of ceilings, 8′ 6″.

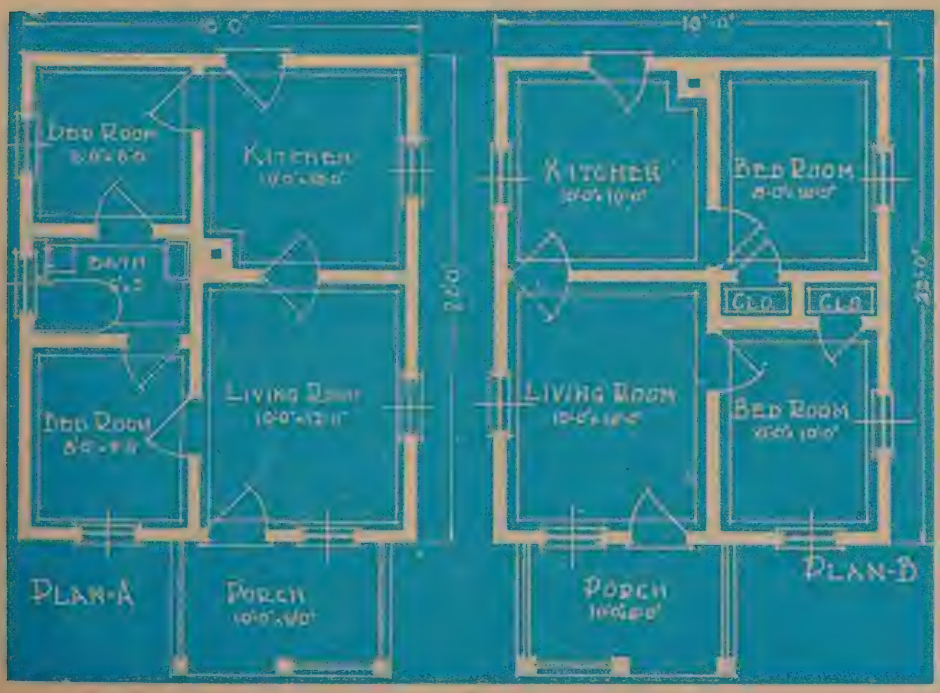






The PROVIDENCE

What makes Liberty Home owners so satisfied —and will please you, too, best of all—is that we put a lot of quality and strength into medium sized homes, and then put absolutely the lowest rock-botton price on it that we can. To get a good, substantial home like the Providence for so low a price is a happy surprise to home builders who have never seen Liberty Homes before. You can even build it yourself. All the difficult measuring, sawing is done in advance for you. Everything is made so simple and easy that no previous experience is necessary. You can build the Providence at such a low cost, the rent you save will pay for it in a few months' time.



In Plan A you have four nice rooms with a bathroom that has a separate entrance from each bedroom. Plan B gives you two bedrooms, each having its own closet, also living room and kitchen. The good looking porch 10'x6' is furnished with both plans. Height of ceilings 8'.

These Specifications Show Why Liberty Homes Are Famous For Quality and Sturdiness

THE sturdiness of a house depends upon two things: (1) the quality of the materials used and (2) the method of construction followed. One is as essential as the other.

Liberty Homes are sturdy homes because the materials which go into them are of unquestionable quality—selected and graded with unusual care. But this is not all! Every piece of lumber is of the right size and strength to support the load which it is expected to carry. Every piece is cut accurately to insure close-fitting joints, and the bridging and bracing are provided at all crucial points so that there is no sagging or swaying. The completed structure stands firm and solid—strong and sturdy, from foundation to peak of roof.

There is no better type of construction than that used in Liberty Homes, as you will see when you study the illustrations and read the detailed specifications given below.

Framing Material

All framing material, including sills, joists, studding, plates, rafters, etc., is carefully selected for quality and strength and is thoroughly dry. It is all machine surfaced on four sides to standard width and thickness, accurately machine cut to fit and marked to conform with the complete detailed working plans.

Girders

Heavy girders or sills, built up of three 2x8's are furnished for all homes excepting the Betsy Ross, Chester, Providence, Sheridan and Sterling which have girders built up of three 2x6's.

First Floor Joists

2x8 floor joists, spaced 16″ on centers, are furnished with all houses excepting the Betsy Ross, Chester, Providence, Sheridan and Sterling, which have 2x8 floor joists spaced 24″ on centers.

Second Floor Joists

In all two-story designs the second floor joists are 2x8 spaced 16″ on centers.

Attic Floor Joists

2x6 attic floor joists spaced 16″ on centers are furnished with designs having a stairway to the attic.

Ceiling Joists

On all spans 14 feet and over, 2x6 ceiling joists spaced 16″ on centers are furnished. On all spans under 14 feet, 2x4 ceiling joists spaced 16″ on centers are furnished.

Studding

2x4 studding, spaced 16″ on centers, all accurately machine cut to fit, are furnished for all outside walls and partitions.

Wall Plates

A single 2x4 plate is used at the bottom and a double 2x4 plate at the top of all walls and partitions. This "Fire Stop Construction" prevents any circulation of air between the studding from the cellar to the attic, thereby reducing the fire hazard and in addition, this construction results in a much warmer and more substantial home.

Rafters

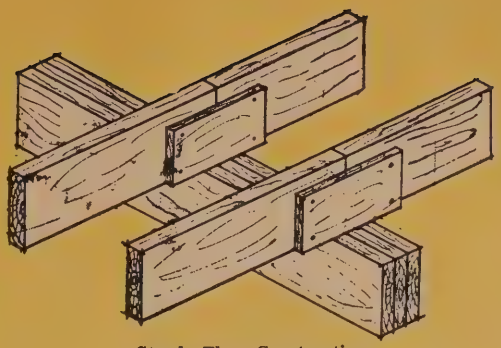
2x6 rafters spaced 24″ on centers are furnished for all homes where the span of the rafter is 13 feet or greater. Where the span is less than 13 feet, 2x4 rafters spaced 24″ on centers are furnished. All rafters are notched, beveled, mitered and cut to exact length, ready to be nailed in place.

Tie Plates

1x6 tie plates are furnished for securely tying together the floor joists and 1x4 tie plates for tying together the ceiling joists in all houses.

Bridging

1x2 floor bridging is furnished for all spans of 12 feet or over. This bridging is cut to fit, ready to nail in place.



Sturdy Floor Construction

Sub-Flooring

Sound 1 inch sheathing lumber, cut accurately to fit, bundled and marked to correspond with the plans, is furnished for all first and second floors. Heavy asphalt saturated building paper is supplied for between the subflooring and finish flooring.

Sidewall Sheathing

Sound 1 inch sheathing lumber, cut accurately to fit, bundled and marked to correspond with the plans is furnished for all outside walls. Heavy asphalt saturated building paper is supplied for between the sidewall sheathing and the siding or shingles.

Roof Boards

1x4 sound roof boards, spaced 2″ apart, are furnished when Red Cedar shingles are used. Spacing the roof boards in this way permits air to get at the shingles underneath, thereby insuring a long lasting roof. When slate surfaced roofing or semi-slate shingles are specified, the roof boards are furnished 1x6 laid tight. All roof boards are machine cut to fit, ready to nail in place.

Roof Shingles

5/2-16″ Clear Red Cedar Shingles are furnished for both the main and porch roofs. (Stain for roof shingles not furnished.) If preferred you may specify Standard high-grade slate surfaced roofing (red or green) in place of Red Cedar shingles at the same price. Sample of the slate surfaced roofing will be mailed to you on request.

Siding

Clear ½x6″ Redwood bevel siding is furnished for the sidewalls of all houses except when shingles are shown. Either shingles or siding for the sidewalls is optional at the same price. When shingles are furnished they are the same high quality as specified for the roof. Two heavy brush coats of quality preservative creosote shingle stain, either Brown or Gray as desired, is furnished for the sidewall shingles.

"It is really a pleasure to write this letter to tell you how well pleased we are with our new home which we moved into two months ago. Words cannot express the pleasure it has brought in our home. We have had many visitors to compliment the fine wood and the plans of the house.

"Our home is one of the nicest in the community. My advise to anyone going to build would be—'Buy a Liberty ready-cut home, for economy, no waste materials, better plans and many more things in their favor."

Hoping that this letter has given you an idea of how well pleased we are in our home, we are"

Mrs. L. Petty & family,
Indiana

~

"I am thoroughly satisfied with my new 'LaSalle' house. The lumber is excellent and there appears to be plenty of everything required. House is not completed but considering the weather we have had it is progressing satisfactorily, having the roof and all outside nearly completed. In short, everything is perfectly satisfactory."

S. W. McClelland, Mass.

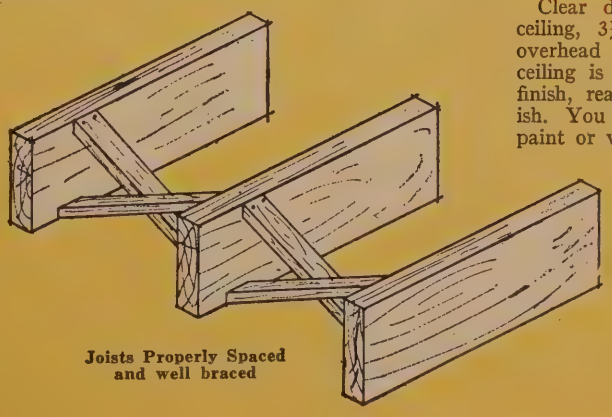
~

"As this is the final payment on my contract, I want to thank you for extending this credit to me and so making it possible for me to own my little home.

"You have been so fair in all your dealings with me that I shall be glad to tell anyone who wishes to build about your homes.

"Again, I thank you."

I. M. Douglas, Penna.



Joists Properly Spaced and well braced

Lath

All Liberty Homes will be prepared to receive lath and plaster. 32″ and 48″ air dried lath are furnished. By having both 32″ and 48″ lath in proper proportion, the lather is enabled to lath with a minimum waste of material and labor.

Partition Furring

1x4 and 1x6 furring strips cut to fit are furnished where required.

Wallboard and Gypsum Lath

If you prefer to use wallboard or gypsum lath instead of lath and plaster, we will omit the wood lath, allowing credit for same as shown on price list. For further information see page 34.

Finish Flooring

The finish flooring in all Liberty Homes is selected clear Douglas Fir, having a 2⅜″ face, evenly matched and well suited for a polished floor. Oak flooring can be furnished when desired at a small additional cost as explained on page 34.

Porch Flooring

The same high grade Fir flooring is furnished for all porches, unless shown in masonry. The porch flooring is all machine cut to fit, ready to nail in place.

Porch Ceiling

Clear double-beaded matched Fir ceiling, 3¼″ face, is furnished for overhead ceiling of all porches. This ceiling is all machined to a smooth finish, ready for the paint or varnish. You have your choice of either paint or varnish for porch ceilings.

Ceiling for Cornices

Clear double beaded matched Fir ceiling 3¼″ face, is furnished for all exposed cornices on main roofs as well as porch and dormer roofs. This gives an attractive, finish-

ed appearance to the roofs which cannot be obtained where the roof boards are carried out over the projection.

Porchwork

Complete materials are furnished for porches, except where shown in masonry. All porch columns, newels, rail, balusters, etc., are furnished completely machined ready to nail in place.

Outside Steps

All material for outside steps is accurately cut to fit, ready to nail together. The front steps on the Columbia, Mayflower, Plymouth and Sheridan are five feet wide, and all other steps are four feet wide, except the Tacoma, Pilgrim and LaSalle which have front steps six feet wide. All rear steps are three feet wide. Steps are not furnished when porch floors or stoops are cement. In such cases the steps should also be constructed of cement.

Cellar Stairs

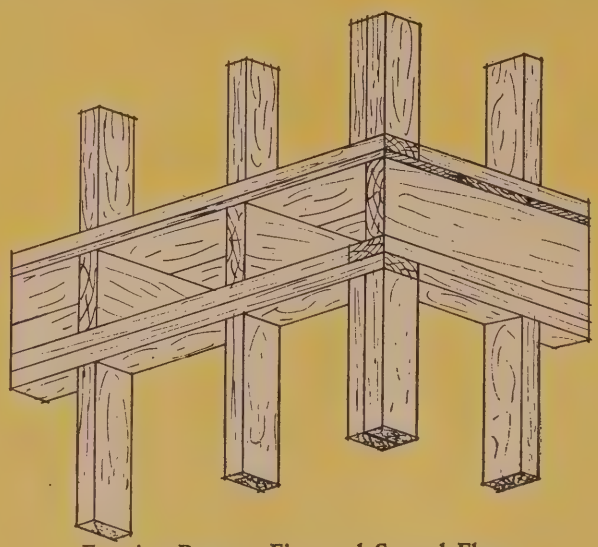
Complete materials for the cellar stairs are furnished where shown on plans. This material is all accurately machine cut to fit, ready to set in place.

Interior Woodwork

All interior trim complete for windows, door casings, door jambs, stops, baseboards, base shoe, stairwork, etc., is manufactured from clear, selected, kiln-dried Yellow Pine. This interior finish is all carefully machined to a smooth, satin-like finish, ready to stain and varnish, and is carefully packed to insure its reaching you in perfect condition.

Back Band Trim

All interior casings for around door and window openings are of an attractive two member backband style.



Framing Between First and Second Floors
Note Firestop Construction

Main Stairs

The most modern and efficient planning and construction are incorporated in Liberty stairs. The intricate work of stair making is all done by modern machinery here in our factory. The supporting rough stringers are cut and notched, finish strings housed, posts assembled, and the treads, risers, moulds, railing and balusters furnished ready to be fitted in place. With treads wedged and glued firmly into the housed strings, the annoyance of squeaky stairs is eliminated.

Mouldings and Outside Trim

All mouldings, corner boards, cornice materials, including facia and frieze boards, furnished complete in required sizes and lengths sufficiently long to allow for accurate fitting.

Brackets

Porch and Cornice brackets are furnished where shown, cut to fit, bundled, and marked, ready to nail together.

Flower Boxes

Complete material for flower boxes and supporting brackets are furnished where shown.

Trellis Work

All material necessary for trellises is furnished when shown in illustration.

Window Shutters

Ornamental window shutters are furnished complete as shown in illustrations.

"I meant to write you some time ago about the "National B" I bought. We have the house completed and have been living in it nearly a month. We are exceptionally well pleased with the house. Everything was better than we expected. The contractor praised the material and workmanship very highly. There was plenty of everything. We have received many very favorable comments on the house. Everyone who has seen it has marveled at the price."

G. B. Sappenfield, Indiana

~

"I cannot explain how much we think of our home. Everyone who sees it likes it. I put it up myself and everything went together perfect. I am proud to show it. I don't think if I had cut every piece myself that it would have gone together as perfect as it did. "We surely enjoy our Lafayette. If I was ever going to build again it would be a Liberty Home."

James D. Duff, Conn.

~

"We are glad we built a Liberty Home as it is just what we want. We received the blueprints and foundation plans right away, and when the lumber came, were ready to start building. Everything was first class and we feel we got a square deal. We find our home to be warm and cozy in the winter and cool in the summer. If we should build again it will certainly be a Liberty Home."

Mrs. Alice Nelson, N. Y.

Door and Window Frames

All frames are clear and free from all defects, machined with great care, and bundled each frame separate. All members are cut to fit ready for assembling.

Windows

All sash are manufactured from clear White Pine—the finest sash produced—and are glazed with fine quality glass, well bedded, tacked and puttied. In all check rail sliding sash windows the size of each glass is 26″x26″, excepting in the kitchen and bathroom, which is 26″x20″. Weights, cord, and pulleys are furnished for all check rail windows.

Inside Doors

All inside doors are standard size 2′ 8″x 6′ 8″, attractive panel design, having beautiful rotary cut Fir panels.

Closet Doors

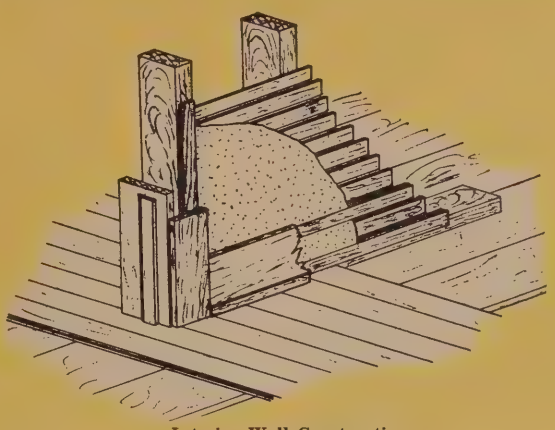
Doors are furnished for all closets, and are complete with regular mortise lockset and hinges. Size of closet doors 2′ 0″x6′8″.

Outside Doors

The front and rear outside doors are size 2′ 8″ x 6′ 8″. The upper half is glazed with clear "A" quality glass. These outside doors are manufactured with solid stiles and rails and solid raised panels. Special design front doors which are optional at a small additional cost, are shown on Page 35.

Building Hardware

All building hardware is furnished complete as required, including heavy galvanized ridge roll, ornamental hip shingles and valley tin. Copper alloy flashings for chimneys and porches. Hot dipped zinc coated shingle nails, sterilized blued lath nails, all other nails and brads of all proper sizes and quantities to complete the work. Heavy weight asphalt saturated building paper is furnished for between the sub-flooring and finish flooring and between the sidewall sheathing and siding or shingles.



Interior Wall Construction

Finish Hardware

The finish hardware is of exceptionally fine quality, modern and attractive in design. Mortise locksets and hinges are furnished for all doors except the double swinging kitchen door, for which is furnished a double acting floor hinge and push plates. All hardware is finished in dull brass. If glass knob sets are desired they will be furnished at an extra cost of only 50 cents per door.

Outside Painting Materials

First quality guaranteed paints for two full coats are furnished in any colors desired for the outside body and trim. The necessary quantities of pure linseed oil and turpentine are furnished for thinning. Special long wearing porch floor paint is furnished for all porch floors and outside steps. When shingles are furnished for sidewalls, preservative creosote shingle stain for two heavy brush coats is supplied. Color card showing outside paints, inside enamels and stains, from which you can choose the colors you prefer, will be mailed on request.

Inside Painting Materials

Strictly pure gum shellac and water-spar varnish or oil stain and water-spar varnish are furnished for all interior woodwork including the doors and trim, window trim and baseboards. For the finish floors 2 coats of heavy water-spar varnish are furnished. When desired we will furnish Enamel for the woodwork in any room at no extra charge. Many prefer to use Enamel in the kitchen and bathroom. When Enamel is used a flat white is furnished as an undercoating for the Enamel. See color card for selection of most popular Enamel finishes and interior oil stain colors.

Built-in Cabinets and Special Millwork

As we operate a large and complete millwork and cabinet factory, we can furnish any type of special cabinets, cupboards, mantels, etc., to your order, should you desire to incorporate such special features in your Liberty Home. Quotations will be furnished on request.

Fireplace and Chimneys

Although on some of the plans the location of fireplaces and chimneys is suggested according to our best judgment, we believe it best to leave the final decision up to the home builder himself. Therefore the material is not cut for fireplace or chimney openings, and you may locate the chimneys anywhere you think best. If you do not want a fireplace you need not build it at all. The material for fireplaces and chimneys is not furnished, as brick, cement, sand, etc., can always be secured to better advantage by the home-builder locally.

Plans to Conform with Local Building Code

The construction of Liberty Homes is carried out in strict accordance with modern engineering practice and will fully meet the requirements in practically all localities. However, if there should be any change from the standard construction that your local building code requires, we will be glad when requested to provide for any necessary changes in the plans without charge, and furnish the materials accordingly, charging only for the extra material, if any, that may be necessary.

Masonry Materials

The prices of masonry materials—such as brick, cement, plaster and sand—are so nearly the same in all sections of the country that it is to the advantage of our customers to secure them in their own particular localities. By doing so, they can get the foundation of the house started without loss of time and have it completed by the time the lumber and other materials arrive.

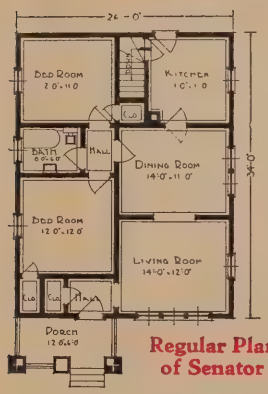
It is important, however, that the foundation or basement be built correctly. We, therefore, furnish complete plans for this purpose without any additional charge. Our aim is to aid our customers in every possible way to secure a first quality home at the very lowest price.

Changes In Plans

Any practical changes can always be made in Liberty Home plans.
See page 34.

Changes Made To Suit Your Desires

In buying a Liberty Home, you do not have to take it "as is." The Liberty System of home building is not "cut and dried." It enables you to make any practical changes according to your desires. Among the house designs illustrated in this catalog, you will find one that suits you exactly, except possibly for certain minor changes. We are glad to accommodate you by making any changes that you may suggest, unless of course, such changes may not be practical.



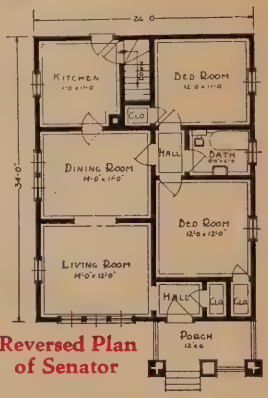
Regular Plan of Senator

Reversed Floor Plans

The above illustrations show how the floor plan of any Liberty home can be reversed so as to switch the rooms from one side to another. In this way any plan can be adapted to your particular lot. Any floor plan will be reversed without charge and the materials furnished cut to fit according to the reversed plan.

Other Changes Easily Made

While we do not quote on home designs other than those illustrated in this catalog, we will gladly give you an estimate as to what it will cost to make any changes that you may desire in any Liberty Home design. Just write and ask us. There is no charge for this service.



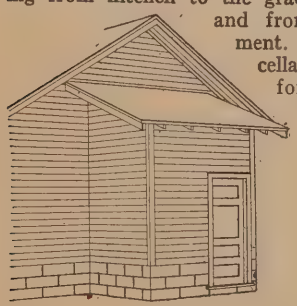
Reversed Plan of Senator

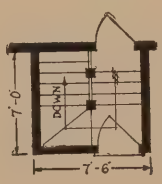
Changing or Omitting Porches

Prices quoted on homes include porches. But for the convenience of those who may want to omit the porch altogether or may desire to substitute one porch for another, a separate price for each porch is given on price list. If the porch is to be omitted the full price of the porch quoted should be deducted from the price of the house. If one porch is to be substituted for another the difference in price of the two porches should be added or deducted as the case may be.

Grade Entrance Addition

An enclosed grade entrance addition with stairs leading from kitchen to the grade landing and grade door and from grade landing to basement. Very convenient where cellar stairs are not provided for in the regular plan.





Select Oak Flooring

Clear Fir flooring is regularly supplied for all rooms but many desire to have Oak Flooring in the living and dining rooms. At the extra prices quoted on price list Select Oak flooring will be furnished to cover the entire floor surface in the living and dining rooms, also vestibules and reception halls.

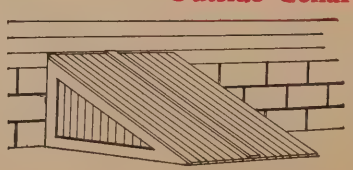
Semi Slate Shingles

Guaranteed semi-slate strip shingles will be furnished instead of the Red Cedar shingles or roofing (See price list). These shingles are cut in the attractive hexagonal pattern and are furnished in red or green color.

Wallboard Instead of Plaster

If you wish to finish the inside walls with wallboard instead of lath and plaster, we will omit the lath, allowing credit as shown on price list.

Outside Cellarway

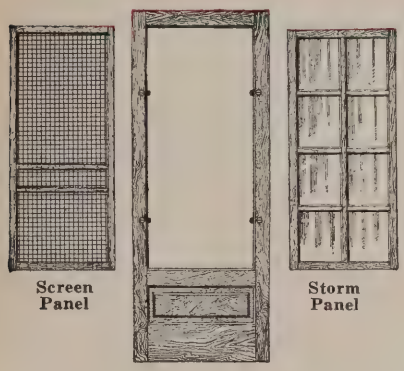


An inexpensive outside entrance to basement. Complete materials furnished, cut-to-fit, including steps.

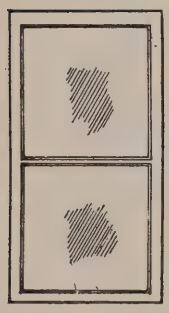
Special Features You May Desire In Your Liberty Home

(See Price List)

Combination Storm and Screen Door



Easily changed from storm door for winter to screen door for summer. The storm panel is glazed with clear glass, the screen panel being tightly covered with fine galvanized screen wire. Size of door 2′8″x6′8″. Shipped complete with all hardware fittings.



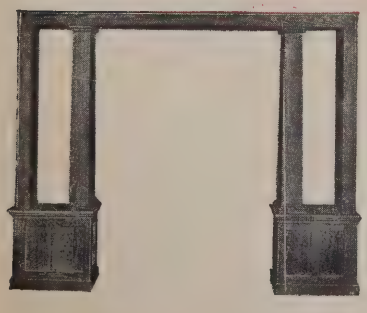
Storm Sash

You can save a large portion of your fuel cost each year and enjoy added comfort in your home by the use of storm sash. These sash are made of clear soft pine, put together in a most substantial manner and will give you good service for many years. High grade window glass is used and is securely tacked and puttied. Prices include necessary hardware fittings.

Bookcase Colonnade Arch

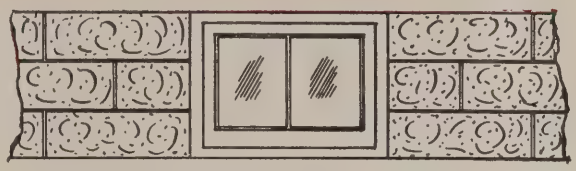
An attractive and useful piece of built in furniture for in the opening between living and dining rooms. Finely finished to match balance of interior woodwork. Doors glazed with leaded glass. Shelves are adjustable. All hardware fittings furnished. Size of bookcases each 2′ 6″ wide, 4′ 6″ high.

Pedestal Colonnade Arch

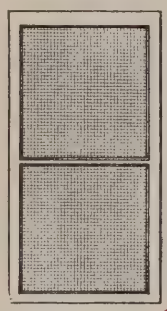


A built-in colonnade for the opening between the living and dining room that will add a tone of refinement and luxury to your home. Made by expert cabinet makers of clear selected material matching balance of interior trim. Furnished assembled ready to set in place.

Cellar Windows



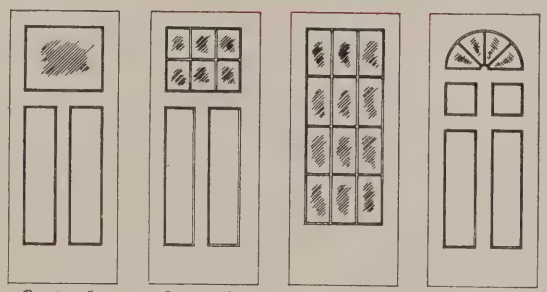
If you intend having a basement you should include in your order the number of cellar windows that are needed. Price quoted includes everything complete, frame, two-light glazed sash, and hardware. Make opening in foundation 2 feet 8 inches wide by 2 feet high and the frames can then be set in place after wall is completed.



Window Screens

Strongly constructed of the highest quality material and can be depended upon for years and years of economical service. Zinc coated screen wire is used which is rust-proof, and at the same time is stiff and strong, made to stand the hard knocks and blows to which screens are often subjected. Prices include necessary hardware fittings.

Special Front Doors



Four popular styles of front doors any one of which may be substituted for the front door regularly furnished at a small difference in price.

Wiring Supplies

Savings of 50% and more on the cost of wiring your home can be obtained by taking advantage of our money saving prices on wiring supplies. We recommend and furnish the B. X. Flexible Metallic Cable System of wiring which is guaranteed to pass the National Electric Standard Wiring Code. Prices quoted cover all necessary materials for the complete wiring of each home including B. X. Metallic Cable, entrance fittings (except main entrance switch), flush tumbler switches and duplex flush convenient wall outlets, Bakelite plates and metal gang boxes for switches and outlets, drop cord connections where needed, all necessary solder, friction tape, and all miscellaneous fittings.

HOW TO ORDER YOUR LIBERTY HOME

To accommodate all our customers we offer several different payment plans. Naturally, the most economical way to buy is for cash. But if it is not convenient for you to forward the entire cash with your order, or if you are financing your new home through a building loan, or you wish to examine the materials before we finally receive payment, one of the payment plans listed below will meet your requirements.

1. Cash Terms

The cash price of each home is shown on the price list which is enclosed. This price includes everything listed under the specifications, including prepaid freight, in accordance with our guarantee. Look up the cash price of your home on the price list. Then you may either send one-third of the cash price with your order and pay the remaining two-thirds when the materials arrive and you take delivery, or you can send the full cash price with your order, less Five Dollars which you may deduct when sending full cash. All remittances should be by certified check, draft, money order or your personal check.

2. 5-Day Examination

Deposit the purchase money for your home in your own bank. Fill out the order blank. Ask your bank to fill out the "Letter of Deposit" on the back of the order. Mail the order to us. The materials will be shipped to you for five days' examination. The bank will not release the money to us until the five day examination period is over, and you find everything satisfactory.

3. Monthly Payment Terms

For homebuilders who find it more convenient to build their home on a monthly payment plan, we have developed a simple, economical method of payment. A small down payment is required with the order and the balance can then be paid over a two or three year period in equal monthly payments, commencing thirty days after your home is received. If you are interested in purchasing your home under this plan, write and tell us which home you have selected and complete information will be promptly sent to you. Thousands of our customers have used this plan to secure homes of their own who could never otherwise have done so.

4. Special Terms

If you are planning on financing your new home through a Bank, Building & Loan Association or other financial institution we are ready to co-operate by arranging terms of payment that will be mutually satisfactory. If you are planning to finance thru an institution that is operating under the Federal Housing Administration we can be of special service to you, as we are fully informed on all requirements for this type of loan, and can assist you in preparing your application, plans, specifications and other necessary details. A letter advising us of your plans will set us to work to help you get your home started with the least possible delay.

Use The Order Blank On Next Page

You have studied the house designs. You have studied the specifications. You have read the letters from other Liberty Home builders. You have seen that Liberty Homes as pictured in this book are designed by skilled architects and engineers, who planned homes that are staunch, sturdy, practical, but also beautiful. One of these homes is just the home you want. Then don't put off building it. Home ownership has been made so easy that you are simply wasting good money if you keep on paying rent. You can be living in the home of your choice within a few short weeks. Decide which of the payment plans listed above will be most convenient for you, then write and let us help you with your plans at once.

READ THEIR LETTERS

"Everything as Represented"

"We have been living in our Lafayette now for some time and we are more than pleased with it.

"Everything was just as you stated it would be, all cut to fit and there was plenty of everything. All was very satisfactory.

"We ordered the porch you designed for the Lafayette and are sending you a picture so you can see how nice our Lafayette looks."

W. L. Purner (Maryland)

"Best of All"

"In reply to your letter asking about my Pilgrim will say I am well pleased with it. "I do not know how much it cost me or just what amount I saved but I have a full basement, furnace, fireplace, walls plastered and Textone over the plaster. "Three men put it up and none were real carpenters. The lumber was all good and I can say that I am well pleased with my dealings with you and I think I have the best home in this locality and of course there are some bigger ones."

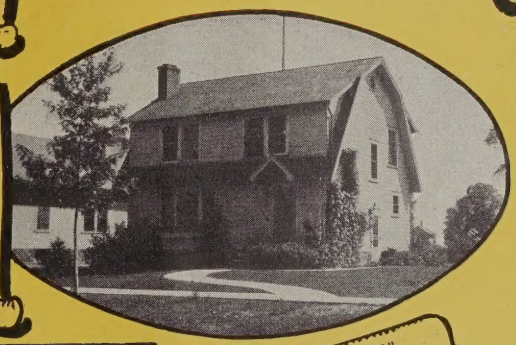
Chas. L. Stein (Indiana)

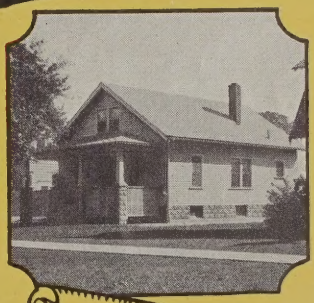
"Saved One-Third"

"After figuring up the cost of our home we could safely say we saved at least one-third of regular building prices by building a Liberty. We erected the Victoria much to our pleasure. It has wonderful floor space. Many people who have seen it are surprised to see the wonderful rooms.

"We hope many more families can share our pleasure and own as warm and comfortable a home as we have."

J. M. Miller (Penna.)





"Saved $1000"

"I am writing to tell you how pleased I am with my new Columbia Home. Our friends all admire it. "We at least saved $1000 on the material and the carpenter work. The carpenters wasted no time measuring and sawing, for everything fit together fine."

Henry Coleman (Iowa)

"Beautiful Woodwork"

"We are now living in our new home, the Mayflower, and it is a pleasure to express to you how well pleased we are with it. All materials were highly satisfactory in both quantity and quality. We are delighted with our beautiful woodwork. The many words of praise expressed by our friends make us feel very proud of our home."

Mr. and Mrs. J. L. Van Patton (Pa.)

"A Perfect Dream"

"I want to thank you for your cordial treatment in our business transaction. I am delighted with our Wellington. It is a perfect dream. I have been much complimented on it, and the material it is made of.

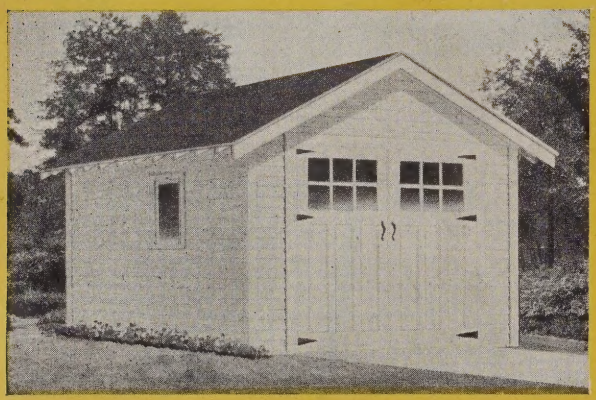
"The house is perfectly satisfactory, and the materials are all that you claimed them to be, and if you choose, you may use my name in one of your testimonials."

Geo. L. Widmeyer (D. C.)

Save Money by Buying a Liberty Home

Liberty Garages

These good looking garages are sturdy in construction and will serve you well for years. Everything is furnished including the hardware for doors and windows, nails, paint for two coats body and trim, slate surfaced roofing, doors, windows and all lumber cut to fit. Complete working plans and instructions for erection furnished free—Materials for floors not furnished as concrete is generally preferred. We pay freight when garage is shipped with Liberty Home.



The Standard

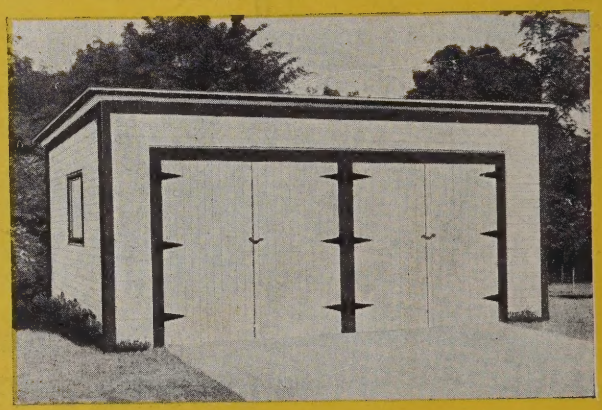
Size 12′x18′ (One Car)

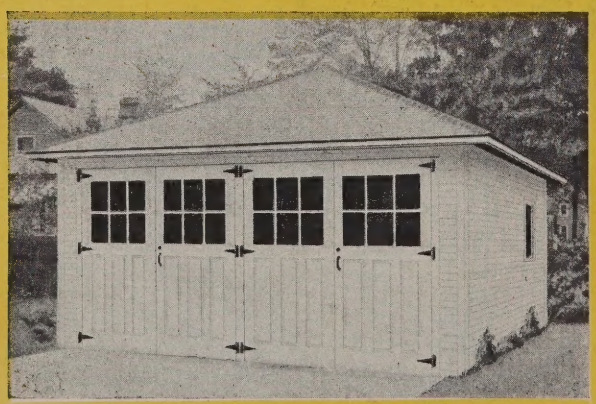
A one car garage that offers exceptional value. Any handy man can build it in two or three days. If you intend to build a garage be sure to take advantage of the saving in freight by ordering it shipped with your home. You can have the garage erected in time to give you a good place to store the house finish materials.

The Overland

Size 18′x18′ (Two Cars)

Here's a real practical double garage for less than is often paid for a one car garage. This type is especially easy to build, yet so far as construction, appearance, and housing a car is concerned, it is equal to any costing three times the price. Outside measurements of floor or wall should be exactly 18′x18′.





The Chrysler

Size 18′x 18′ (Two Cars)
Size 20′x20′ (Two Cars)

An extremely popular garage, attractive in appearance and sturdy in construction. Will harmonize well with most any type of home and add materially to its resale value. Glazed doors are furnished as shown.

Garage service door, size 2′8″ x 6′8″ will be furnished with any garage. Price complete, including door, frame and hardware—$7.50.
